+91 9820045154 | hr@augmntx.com

Experienced Test Engineer with over 6+ years of experience in Software Testing. Quality expert with success reviewing features and assessing functionality to identify common and complex software problems. Experienced background in writing cucumber scenarios and automated test scripts.

INDUSTRIES: Software and Platforms, Logistics, Insurance

TECHNICAL SKILLS

• Software Testing	6 years
• Automation Testing	5 years
• Manual Testing	4 years
• Selenium	4 years
• Cyprus	1 years
• Playwright	1 years
• Browser stack	1 years

SOFT SKILLS

Communication, Teamwork, Time management

PROJECT DETAILS

• Computer Vision

Project Description: Environment: Implemented API Automation using Postman and Newman. JIRA as Test Management Tool, QASE for test case writing. On job accomplishments: Analyzed the overall project and crafted test cases for the API automation. Worked on automating Tests under Postman for different modules and execute it using Newman

Responsibilities: Participating in sprint plannings Attending daily stand up, demos and review meetings Understanding the business requirements Test Cases Designing and Execution work on mobile automation Performed API automation using Postman

Technologies: typeScript, Jira, Github, Playwright

Industry: Software and Platforms

• Transportation, Logistics & Supply

Project Description: Environment: Implement Automation Script using Java-SeleniumestNG framework, JIRA as Test Management Tool, Postman for API testing On job accomplishments: Work with the business team to analyze the business requirement to get it aligned with the Functional and Test requirements . Complete end to end testing both for UI and API. Worked on automating the Test scripts for regression and functional execution

Responsibilities: Participating in sprint planning and estimation meetings Estimating the user stories Attending daily stand up, demos and retrospective meetings Understanding the business requirements Test Cases Designing and Execution for web apps. Performed various black box testing Methodologies Like functional testing and Regression Testing. Manage code base using GitLab. Performed API testing using Postman. Performing various types of testing Like GUI Testing, Integration Testing, User Acceptance Testing, Cross Browser Testing, End to End Testing. Raising pull request Review of pull request

Technologies: Java Script, Jira, Github, Selenium

Industry: Logistics

• Supply Chain & Logistics

Project Description: Environment: Implement Automation Script using Rest Assured for API automation. On job accomplishments: Work with the business team to analyze the business requirement to get it aligned with the Functional and Test requirements . Worked on validating the extraction/transformation files on the S3 bucket. Write SQL queries to get data and analyze it.
Responsibilities: Participating in sprint planning and estimation meetings Estimating the user stories Attending daily stand up, demos and retrospective meetings Understanding the business requirements Test Cases Designing and Execution. Performed API testing using Postman and Rest Asured.
Technologies: Java, Jira, Github, Selenium
Industry: Logistics

• Employee Benefits Insurance

Project Description: Environment: Implement Automation Script using Protractor-typescript-cucumber framework, JIRA as Test Management Tool On job accomplishments: Analyze story card requirements and write gherkin test scenarios to test acceptance criteria and feature tickets. Created automation scripts and user-defined methods and executed them on a daily basis. Collaborate with developers and project managers to access project capabilities , features and testing demands
Responsibilities: Participated in sprint planning meetings. Reviewing requirements and raising clarifications where needed. Participated in daily scrum meetings to explain daily status to scrum. Test Cases Designing and Execution for web apps. Identification of automation candidates. Worked on a test automation framework using Java Script. Manage code base using BitBucket. Bug Identification and Reporting. Performed various black box testing Methodologies Like functional testing and Regression Testing. Performing various types of testing Like GUI Testing, Integration Testing, User Acceptance Testing, Cross Browser Testing, End to End Testing. Raising pull request Review of pull request
Technologies: Java, Jira, Github, Selenium
Industry: Insurance

• MSNAgile Software

Project Description: Environment: Implemented Load Testing using JMeter On job accomplishments: Analyzed the overall project and crafted use cases for the Load Testing. Proficient in designing workload models, executing the Load tests and reporting observations.
Responsibilities: Participated in sprint planning meetings. Reviewing requirements and raising clarifications where needed. Participated in daily scrum meetings to explain daily status to scrum. Test Cases Designing and Execution for web apps. Identification of automation candidates. Worked on a test automation framework using Java Script. Manage code base using BitBucket. Bug Identification and Reporting. Performed various black box testing Methodologies Like functional testing and Regression Testing. Performing various types of testing Like GUI Testing, Integration Testing, User Acceptance Testing, Cross Browser Testing, End to End Testing. Raising pull request Review of pull request
Technologies: Java, Jira, Github, Selenium
Industry: Software and Platforms

EMPLOYMENT HISTORY

• QA Engineer

Description: Total 6+ years of experience in Software Testing in both automation and manual. Good understanding of java-selenium-TestNG,protractor-Typescript-Cucumber and frameworks. Good understanding of POSTMAN and Rest Assured for API automation Good understanding of version controlling tools like BitBucket, GitLab. Experienced working with Test Automation framework - Cucumber with protractor- typescript BDD framework. Experience working on Visual Studio Code. Experience working on playwright. Knowledge of Test Management Tool - JIRA, QASE Basic knowledge of Jenkins and Build deployment Process. Knowledge of OOPS concept and experienced in programming language – JAVA, Java Script, TypeScript Experienced in Performance Testing Automation Tool - JMeter Basic knowledge of SQL Knowledge working on some AWS components. Ability to adapt to a new environment quickly, team player, good communication, positive attitude, sincere and committed. Ability to understand application business requirements. Flexible and adapt quickly to new working environments.

EDUCATION

• Bachelors degree in BCA from DIMS Meerut 2014 - 2017

LANGUAGES

• English - advanced
