Results-driven SDET with 10.2 years of experience in automation testing, framework development, and CI/CD integration Results-drive in API automation Rest assured using Java. Experience on Web services testing using Advanced REST client/Postman and web services test using Java Rest Assured. Expertise in Web UI automation using selenium web driver with java. Developed and executed automated functional, regression, and smoke tests using Cypress, identifying critical bugs before production deployment with JavaScript. Specialized in testing Web based applications with an extensive experience in creating test scenarios, test cases, test execution and reporting

INDUSTRIES: Software and Platforms, Insurance, Technology

TECHNICAL SKILLS

• Automation Testing	7 years & 2 months
• Selenium	7 years & 2 months
• Manual Testing	3 years & 2 months
• Cyprus	6 months
• Playwright	6 months

SOFT SKILLS

Teamwork, Communication, Critical thinking, Problem-solving

PROJECT DETAILS

• DSS

Project Description: Data standardization suite application enhances DSS endpoints which provides content to upstream services across allstate
Responsibilities: Coding of several feature as per the business requirements and preparing technical specification documents for those functionalities. Involved in Functionality testing, Integration testing and Regression testing. Involved in automating the APIs for testing several PCSUI, PCS and WCS services. Deploying the micro services in the Jenkins. Validated REST API responses through Postman and ensured data accuracy by querying relational databases using Developed and maintained automated end-to end tests using Cypress for web applications.
Technologies: Selenium web driver, Cypress, API automation, Java, JavaScript, GitHub, postman, SQL and Jenkins
Industry: Software and Platforms

• Fis global information services

Project Description: World pay Card Payments processing platform implementation and product compliance for major Card networks Visa/MasterCard/Amex.
Responsibilities: Product Compliance testing for a Payment Acquirer Bank for leading Card networks Visa, MasterCard and Amex. Coding of several feature as per the business requirements and preparing technical specification documents for those functionalities. Involved in automating the APIs for testing several payment acquirer bank for leading card networks. Actively involved in the peer to peer code reviews. Contributed as an SDET with debugging and designing Dev code as per requirement. QA Mentor for multiple teams across the Agile Release Train (ART).
Technologies: API automation, Groovy, Bitbucket, squirrel, postman and Jenkins
Industry: Insurance

• Test Automation Execution

Project Description: Apple is a corporation that sells data mining platforms through online portals, computerized legal research and information about vast swaths of consumers around the world.
Responsibilities: Involved in Test Automation Execution and actively participated in reviews and status meetings. Team management by allocating the jobs to each other in team. Ensuring that automation tasks are completed within the timeline provided and that issues are fully tested. Involved in analyzing specification documents to develop Test Cases and Test Scenarios
Technologies: Selenium, Core java, Bitbucket, Qtest and Jenkins
Industry: Technology

EMPLOYMENT HISTORY

• Senior Lead consultant March-2023 - January-2025

Description: Coding of several feature as per the business requirements and preparing technical specification documents for those functionalities. Involved in Functionality testing, Integration testing and Regression testing. Involved in automating the API's for testing several PCSUI, PCS and WCS services. Deploying the micro services in the Jenkins. Validated REST API responses through Postman and ensured data accuracy by querying relational databases using Developed and maintained automated end-to-end tests using Cypress for web applications.
