SOFT SKILLS

Time management

PROJECT DETAILS

• Zovio — September-2020 - September-2022

Project Description: Zovio is an education technology services company that creates highly personalized interactions backed by predictive data and analytics. This project is using MuleSoft for multiple integrations between web portals, Salesforce, OAP, SIS and other enrollment related applications. This is an ongoing migration project where legacy integrations and CRM data are being moved to MuleSoft and Salesforce respectively.
Responsibilities: Working with client directly to develop REST APIs and Event-based APIs using MuleSoft Using Anypoint Platform for API Design and Cloudhub for deploying applications APIs are designed and developed following API-led Connectivity approach Using Anypoint MQ for event based process APIs for asynchronous interactions Azure Service Bus Connector is used to send messages to SIS application running on Azure Azure DevOps is being used for version control, project management and automated builds Common global error handler is used in all APIs to handle various errors
Technologies: Mulesoft
Industry: Education

• Yext March-2022 - September-2022

Project Description: Yext is a New York City technology company operating in the area of on-line brand management. It offers brand updates using its cloud-based network of apps, search engines and other facilities. This project is using MuleSoft as an integration solution to sync data between different ERP, CRM and Finance systems..

Responsibilities: Worked with client directly to develop Mule applications to sync financial data between RevSym, SAP S/4 HANA, SAP Concur and Netsuite Used Cloudhub as a deployment solution and implemented Jenkins pipeline for CICD Used batch processing and bulk operations to achieve parallel processing Documentation of architecture and technical design was done for all applications Secured properties extension was used to store endpoint credentials and other sensitive configuration properties Exception handling used diligently to avoid any message loss

Technologies: Mulesoft

Industry: Finance

EMPLOYMENT HISTORY

• Co-founder July-2024 - March-2025

Description: Focussed on Salesforce based integrations and architecting the API-led connectivity approach to solve integration problems. Developed and maintained MuleSoft APIs to synchronize data between Salesforce and ERPs, utilizing pre-built Salesforce connectors to accelerate integration timelines. Setup Anypoint Platform by creating Business groups, API policies, and deployment environments.

CERTIFICATION

- MCPA by Salesforce 0
- MCIA by Salesforce 0
- MCD Level -1 by Salesforce 0

EDUCATION

• Bachelors degree in Computer Science from PTU 2008 - 2012

LANGUAGES

• English - advanced
