~6 years of experience as a seasoned React Native developer, with expertise in developing high-quality mobile applications ~Proficient in tools like VS Code, XCode, Android Studio, Google Developer Console, and Apple Developer Console ~Skilled in programming languages and technologies including JavaScript, TypeScript, Redux, REST API integration, GraphQL, and Apollo-client ~Strong understanding of project analysis, requirements gathering, design, development, testing, and documentation, ensuring seamless project execution ~Proven track record of delivering projects on time and exceeding client expectations ~Collaborative team player with excellent communication skills. ~Always staying up-to-date with the latest industry trends and best practices

INDUSTRIES: Healthcare, Dating, Social Networking, Petconomy, LifeStyle, Ecommerce, CRM, media

TECHNICAL SKILLS

• React Native	7 years
• React js	7 years
• JavaScript	7 years
• RESTful API	6 years
• TypeScript	6 years & 2 months
• Redux	6 years
• Github	6 years
• Apollo Server	5 years
• GraphQL	5 years
• Firebase	5 years
• AWS	5 years
• Xcode	5 years
• Android Studio	5 years
• VSCode	5 years
• Node.js	5 years & 3 months
• Push Notifications	5 years
• Payment Gateway	4 years

SOFT SKILLS

Teamwork, Leadership, Communication, Problem-solving, Time management, Critical thinking

PROJECT DETAILS

• Health-e

Project Description: Health-e is a ground breaking healthcare application designed to streamline access to medical information

Responsibilities: I played a pivotal role in the development of Health-e, a groundbreaking healthcare application designed to streamline access to medical information. As part of the team, I contributed to creating a secure digital health locker that allows users to conveniently store and access a wide range of medical records, including lab reports, insurance details, and immunization records. Additionally, I helped implement features for tracking family health profiles and facilitating seamless sharing of medical information with healthcare providers. With a strong emphasis on privacy and security, Health-e ensures that users can manage their health confidently and securely online

Technologies: React Native, JavaScript, Redux, Push-notification, Firebase, Payment Integration and other 3rd party tools

Industry: Healthcare

• Every

Project Description: Every is a mobile dating application tailored for the LGBTQ+ community

Responsibilities: I contributed to the development of a mobile dating application tailored for the LGBTQ+ community, focusing on delivering a user-friendly and secure platform for swiping, matching, and connecting with other members. The app utilizes advanced technologies such as React Native, Redux, Typescript, GraphQL, and AWS web services to ensure a seamless and intuitive user experience.

Technologies: React Native, Redux, Typescript, GraphQL, AWS web services, Push notification, In-App purchase

Industry: Dating

• Matchly app

Project Description: Matchly App is a dynamic dating application aimed at simplifying the search for meaningful connections.

Responsibilities: I played a key role in developing Matchly, a dynamic dating application aimed at simplifying the search for meaningful connections. I contributed to creating its intuitive interface and integrating innovative features such as swipe actions (right, left, and bottom) for discovering potential matches effortlessly. Additionally, I implemented seamless communication functionalities including chat and video options, enabling real-time interactions to foster deeper connections among users. My involvement also included enhancing profile viewing capabilities, ensuring users can make informed decisions while exploring potential matches.

Technologies: React Native, JavaScript, REST API

Industry: Dating

• Meme Biz

Project Description: Meme Biz is a revolutionary social networking application tailored for meme enthusiasts and creators globally.

Responsibilities: I contributed to the development of Meme Biz, a revolutionary social networking application tailored for meme enthusiasts and creators globally. My role involved collaborating on the creation of a platform where users can showcase their creativity, engage in friendly competition, and monetize viral content creation.

Technologies: React Native, Typescript, Redux, Push notification, GraphQL, Firebase

Industry: Social Networking

• My Guinea Pigs

Project Description: My Guinea Pigs is a comprehensive mobile application designed to support guinea pig owners in caring for their pets

Responsibilities: I contributed to the development of My Guinea Pigs, a comprehensive mobile application designed to support guinea pig owners in caring for their pets. The app offers essential features such as weight tracking, vet visit management, meal planning, and a guide to understanding guinea pig vocalizations. With a strong emphasis on community engagement and expert advice, My Guinea Pigs is indispensable for enthusiasts dedicated to the well-being of these beloved animals.

Technologies: React Native, JavaScript, Redux, REST API

Industry: Petconomy

• Bokkie app

Project Description: Bokkie is a mobile application focused on providing female- oriented voucher codes, discounts, and savings from top brands

Responsibilities: I contributed to the development of Bokkie, a mobile application focused on providing female- oriented voucher codes, discounts, and savings from top brands. My role included enhancing the app's functionality to deliver real-time code alerts directly to users' devices, facilitating seamless access to irresistible discounts during online shopping. Bokkie is designed to empower women by enabling them to save money effortlessly on their favorite products, reflecting my commitment to creating user-centric solutions in the mobile app development space.

Technologies: React Native, JavaScript, Redux, REST API

Industry: LifeStyle

• JSOM Store

Project Description: JSOM Store is a foundational e-commerce mobile application featuring essential functionalities such as user authentication (sign-in, sign-up), product catalog listing, cart management (adding items), and streamlined checkout processes

Responsibilities: I contributed to the development of JSOM Store, a foundational e-commerce mobile application featuring essential functionalities such as user authentication (sign-in, sign-up), product catalog listing, cart management (adding items), and streamlined checkout processes. My role involved implementing user- friendly interfaces and backend solutions to ensure a seamless shopping experience for customers

Technologies: React Native, Javascript, React.js, Node.js, Express, MongoDB

Industry: Ecommerce

• Visibility

Project Description: Visibility CRM is a specialized customer relationship management system tailored for capital equipment dealers.

Responsibilities: I was instrumental in the development of Visibility CRM, a specialized customer relationship management system tailored for capital equipment dealers. This application equips dealers with essential tools for inventory management, sales deal tracking, and comprehensive customer data storage. My role included enhancing user experience through intuitive interfaces and optimizing backend functionalities to ensure efficient operations.

Technologies: React Native, React JS, JavaScript, Redux, REST API

Industry: CRM

• Newsline - News Application

Project Description: Newsline is a dynamic news application designed to deliver real-time updates and personalized news feeds

Responsibilities: contributed to the development of Newsline, a dynamic news application designed to deliver real-time updates and personalized news feeds. Users can customize their experience by selecting specific topics, keywords, or sources of interest. My role included implementing features for engaging in discussions, sharing articles on social media platforms, and organizing saved stories for convenient access. Newsline ensures users stay informed and connected to global news effortlessly, showcasing my proficiency in developing user-centric mobile applications.

Technologies: React Native, Javascript, React.js, Node.js, Express, MongoDB

Industry: media

EDUCATION

• Bachelors degree in B.tech from Uka Tarsadia University	2017 - 2021
• Diploma degree in Computer Engineering from Government Polytechnic, Gandhi Nagar	2015 - 2018

LANGUAGES

• English - advanced
