I'm a MuleSoft Developer with 3 years of experience in API development, SOA migration, and data integration. I worked on logistics domain projects for CMA CGM at Infosys, specializing in RESTful and SOAP APIs, Solace, Kong API Gateway, and PostgreSQL. I holds an MCD Level 1 Certification and has contributed to projects involving legacy system modernization, real-time messaging, and API security.

INDUSTRIES: Logistics

TECHNICAL SKILLS

• Mulesoft	3 years
• CI CD Pipeline	3 years
• Anypoint Platform	3 years
• Jenkins	3 years
• Gitlab	3 years
• Elasticsearch	2 years
• SOAP Web Service	2 years
• Stored procedure	2 years & 6 months
• JMS	1 years & 5 months
• Kong Gateway	1 years & 5 months

PROJECT DETAILS

• Lara HIP Factory August-2022 - December-2023

Project Description: Lara HIP Factory focused on modernizing legacy SOA-based APIs by implementing MuleSoft APIs as proxies (pass-through APIs). The goal was to enable seamless communication between existing SOA REST APIs and external applications.

Responsibilities: Developed pass-through APIs for SOA REST services. Migrated SOA APIs to MuleSoft for improved scalability and maintainability. Ensured secure and efficient API communication. Collaborated with cross-functional teams for API design and integration.

Technologies: MuleSoft

Industry: Logistics

• Dataways

Project Description: The Dataways project focused on data integration and real-time messaging. APIs were developed to fetch data from various databases and publish it to Solace, ensuring smooth data flow across different systems. The project also involved working with Kong API Gateway for secure API management.
Responsibilities: 1. API Development & Integration Designed and developed RESTful and SOAP-based APIs using MuleSoft. Integrated APIs with databases, message brokers (Solace), and third-party systems. 2. SOA Migration & Proxification Migrated legacy SOA APIs to MuleSoft. Developed pass-through (proxy) APIs to enable seamless communication between services. 3. Event-Driven Architecture Published and consumed messages from Solace for real-time data exchange. Implemented event-driven processing for efficient data flow. 4. Kong API Gateway & Security Integrated APIs with Kong API Gateway for traffic management and security. Implemented authentication, authorization, and rate-limiting policies. 5. Database Operations Designed and implemented database queries in PostgreSQL. Retrieved and processed data from various database systems. 6. Performance Optimization & Troubleshooting Identified and resolved API performance bottlenecks. Debugged and troubleshot MuleSoft applications using logs and monitoring tools. 7. Deployment & Monitoring Deployed APIs to CloudHub and on-premise environments. Monitored API health and resolved issues in production. 8. Collaboration & Documentation Worked with cross-functional teams (developers, testers, architects) for API design and integration. Created technical documentation, API specifications, and best practices guides.
Technologies: MuleSoft
Industry: Logistics

EMPLOYMENT HISTORY

• MuleSoft Developer

Description: MuleSoft Developer | Infosys (3 Years) Certification: MuleSoft Certified Developer (MCD) – Level 1 Domain: Logistics Client: CMA CGM Projects: 1. Lara HIP Factory Developed pass-through APIs (Proxification phase) for SOA REST APIs. Migrated SOA APIs to MuleSoft for e-commerce integration. 2. Dataways Designed and developed APIs to fetch data from databases. Published data to Solace for event-driven architecture. Developed SOAP APIs and integrated with Kong API Gateway. Worked on PostgreSQL database operations. Skills & Tools: MuleSoft, API Development, Solace, PostgreSQL, Kong API Gateway, SOAP, REST, SOA Migration, Database Integration

CERTIFICATION

• MuleSoft MCD level 1 by Trailhead 2022

EDUCATION

• Bachelors degree in Computer science and engineering from JNTUH 2016 - 2020

LANGUAGES

• English - advanced
