I am a passionate and results-driven Lead OutSystems Developer with over 3 years of hands-on experience in designing, developing, and deploying high-quality web and mobile applications using the OutSystems low-code platform. Throughout my career, I've demonstrated a strong ability to lead development teams, collaborate with cross-functional stakeholders, and deliver efficient, scalable, and user-friendly solutions. My expertise includes application architecture, integration, and optimization, with a focus on ensuring high performance and seamless user experiences. I thrive in fast-paced environments and am committed to continuous learning and staying at the forefront of technological advancements in the OutSystems ecosystem.

INDUSTRIES: Project Management, Logistics and Supply Chain

TECHNICAL SKILLS

• Outsystems	3 years & 2 months
• SQL	3 years & 2 months
• css	2 years
• JavaScript	2 years
• Outsystems ODC	1 years

PROJECT DETAILS

• IQMS September-2022 - June-2023

Project Description: IQMS is Integrity and Quality Management System for Projects. It had features like Matrix Management System, Project Health Report, Customer Satisfaction Report, Audits for Project, RAID (Risk, Assumption, Issue, Dependency) Management System,

Responsibilities: Designed and developed a comprehensive Integrity and Quality Management System (IQMS) utilizing the OutSystems low-code development platform, resulting in a 40% increase in operational efficiency compared to the previous application. Managed the "Email" and "Timers" functionalities to ensure timely email notifications were dispatched to the appropriate users or personas. Accountable for designing and implementing a complex database to meet the requirements of the specified interface. Utilized the "Advanced Excel" Forge component to generate Excel reports. Accountable for independently designing and developing 6 to 7 screens, catering to 7 distinct user roles/personas. Developed notification and alerting Email mechanisms, resulting in a 50% improvement in communication and responsiveness across teams.

Technologies: Outsystems

Industry: Project Management

• Freight Claims

Project Description: Claim Management system for the Freight/Parcel that gets lost, gets stolen or delivered but in broken manner to the customer

Responsibilities: Designed and Developed full stack Freight claims management system which is 60% more efficient than the previous system. Utilized OutSystems development environment to create responsive user interfaces and seamless user experiences for claim submission, tracking, and resolution. Conducted thorough testing and debugging to ensure application reliability and performance under various scenarios which resulted in reduction of 25% post release bug. Implemented custom logic and workflows to automate claim validation, approval, and payment processes, reducing manual errors and processing time by 40%. Used Timers to run back-job every week to copy claims data from a Word file to application's database. Designed and developed 8 distinct user interface screens throughout the project timeline, resulting in a streamlined user experience that improved customer satisfaction ratings by 25% and enhanced user retention metrics.

Technologies: Outsystems, CSS, SQL

Industry: Logistics and Supply Chain

EMPLOYMENT HISTORY

• Lead Expert

Description: Directly engage with 3+ business stakeholders to gather, analyze, and refine project requirements, ensuring 100% alignment with business objectives. Lead the complete SDLC of applications using OutSystems ODC, from concept to deployment, implementing best practices to improve performance by 30% and ensuring scalability. Design and develop intuitive user interfaces that enhance user experience, optimizing workflows and reusability to reduce development time by 40%

• Senior Software Engineer January-2022 - January-2025

Persistent Systems

Description: Engineered and maintained OutSystems applications for diverse clients, ensuring optimal performance and reliability. Experience in modern API technologies such as consumption of Rest API method. Designed and developed OutSystems modules for internal use, streamlining business processes and improving efficiency.

EDUCATION

• Bachelors degree in Computer Science from RGPV 2018 - 2022

LANGUAGES

• English - intermediate
