I am a Senior Software Engineer with 4 years of experience, specializing in OutSystems development and enterprise solutions. I excel at building scalable applications, optimizing performance, and driving digital transformation. With expertise in API integration, front-end development, and leading teams, I deliver innovative, high-impact solutions that enhance efficiency and exceed client expectations.

INDUSTRIES: Logistics Management System, Trading

TECHNICAL SKILLS

• Outsystems	3 years & 6 months
• JavaScript	3 years & 6 months
• HTML & CSS	3 years & 6 months
• API	3 years & 2 months
• SQL	3 years & 2 months

PROJECT DETAILS

• Brill dog — April-2023 - June-2023

Project Description: This project involved developing a logistics management system with real-time shipment tracking and secure payment processing via Stripe. The application optimized transaction workflows, reducing processing time by 30%, while enhancing operational efficiency and providing accurate tracking and reporting capabilities.
Responsibilities: I developed and maintained a logistics management system with real-time tracking capabilities and integrated Stripe for secure payment processing. My responsibilities involved optimizing transaction workflows to reduce processing time by 30%, enhancing operational efficiency, and ensuring accurate data synchronization across systems for seamless tracking and reporting.
Technologies: OutSystems 11
Industry: Logistics Management System

• Trading application — July-2023 - July-2024

Project Description: A comprehensive trading platform developed using OutSystems, integrating essential third-party services like DocuSign for secure digital agreements and Google Analytics for advanced user behavior tracking. The system supports real-time data processing, enabling faster trading operations and improving user insights through data analysis.
Responsibilities: My responsibilities included developing a trading platform using OutSystems, integrating third-party services such as DocuSign for digital agreements and Google Analytics for user behavior tracking. I focused on improving real-time data processing, enhancing user interfaces, and ensuring secure and accurate transaction handling to deliver a smooth trading experience.
Technologies: Outsystems 11 and mobile app
Industry: Trading

EMPLOYMENT HISTORY

• Senior Software Engineer

Description: As a Senior Software Engineer at LTI Mindtree, I am responsible for designing and developing scalable software solutions using the OutSystems platform, with a focus on building efficient architectures and optimizing system performance. I collaborate with cross-functional teams to deliver high-quality software within deadlines while improving user experience through advanced front-end development. Additionally, I guide and mentor junior developers, supporting their technical growth and contributing to a productive team environment. My work involves streamlining processes, implementing best practices, and ensuring the delivery of reliable and effective solutions.

CERTIFICATION

- OutSystems Developer Cloud (ODC) by OutSystems 2023
- Mobile Developer Specialist by OutSystems 2022
- Associate Reactive Developer (O11) by OutSystems 2021

EDUCATION

- Bachelors degree in Computer Science from Rajasthan Technical University 2017 - 2021

LANGUAGES

- English - advanced
