I am a experienced Power BI Developer with over six years in the IT industry, specializing in business intelligence and data visualization. With expertise in Microsoft Power BI, he excels in designing, developing, and implementing dynamic reports and dashboards that drive data-driven decision-making. Sunil has worked with leading organizations such as NEXUS SYSTEM and SDNA TECH, handling projects across healthcare, microbiology, and financial sectors. He has strong technical skills in SQL Server, Teradata, SSAS, and ETL tools like SSIS and Power Query. His proficiency in connecting diverse data sources, creating interactive visualizations, and automating reporting processes has significantly contributed to operational efficiency. A Bachelor of Technology graduate, Sunil is adept at collaborating with stakeholders, gathering requirements, and translating business needs into actionable insights. His commitment to delivering high-quality analytical solutions makes him a valuable asset in any data-driven organization

**INDUSTRIES:** Healthcare

## TECHNICAL SKILLS

| | |
|---|---|
| • Power BI Desktop | 5 years & 7 months |
| • excel | 5 years & 8 months |
| • SQL Server | 4 years & 2 months |
| • SSAS | 2 years |
| • SSIS | 1 years & 3 months |
| • Microsoft Fabric | 1 years & 6 months |

## PROJECT DETAILS

• Capitation November-2020 - June-2022

Project Description: Texas Health Resources is one of the largest faith based, health care delivery systems in the United States and the largest in North Texas in terms of patient served. The Texas Healthcare resource payers and providers have access to more data than ever before, yet many struggle with managing the growing volume of it and using it to their advantage. With the industry shifting from fee for service to value based care, organizations need help making data interoperable and aligning claims and clinical systems to drive more coordinated care, new payment models and population health initiatives. Integrating and analyzing data from so many diverse sources.
Responsibilities: Developed an interactive Power BI dashboard utilizing SQL database transactions to provide real-time insights into key financial metrics and trends.
Technologies: Power bi desktop, SQL server, excel, SSAS,jira
Industry: Healthcare

• MTF August-2022 - January-2025

Project Description: The project is about getting the required information about different tests and samples analysis, tissues the performance of each sample in different locations. The information coming from this application can be used to generate reports and maintainance of data of each tested sample with status changes by daily , weekly ,monthly and yearly.

Responsibilities: Designing, developing and implementing Business Intelligence reports. Crafting and executing queries upon request of data. Creating measures and columns with DAX in SSAS & POWER BI DESKTOP. Experience on Creating Workspaces and Subscriptions. Published/shared the reports by creating Content Pack/Sharing the PBIX file. Publishing Dashboards and Reports using Automation Scripts. Worked on On-Premises Gateway to refresh the data sources/creating a live connection. Configuration the Gateways. Experience in Custom visuals and Groups creations. Maintaining and supporting the reports on Production Server

Technologies: Power bi desktop, SQL server, SharePoint, google sheets, service now

Industry: Healthcare

• Population Health November-2017 - August-2020

Project Description: The project is about getting the required information about different products and analysis the performance of each product in different regions. The information coming from this application can be used to generate reports and take Business related decisions like enhancement of the existing products or bringing a new product as per the customer and market requirement.

Responsibilities: Gathering the requirements from business users and analyzing those requirements and providing estimates. Created source to target mapping documents from staging area to Data Warehouse and from Data Warehouse. Participating Weekly, Daily and Ad-hoc meetings. Visualize complex data and interactions between internal and external data sources. Building, publishing customized interactive reports and dashboards, Implement action filters, parameters, calculated filed and set for preparing Reports and dashboard Worked on Parameters, Table Calculations and Hierarchies. Effectively used data blending, data joins and Level of Detail Expressions Creating the parameter and dimension based reports, drill-down reports, charts, and Power bi reports using Power bi Desktop. Execute and tested required queries and reports before publishing dashboards. Supporting development of automation workflows such that they result in reusable assets that can be leveraged across other projects.

Technologies: Power bi, SQL server, report builder, jira

Industry: Healthcare

## EMPLOYMENT HISTORY

• Power BI Developer Data Analyst August-2022 - January-2025

Description: Designing, developing and implementing Business Intelligence reports.  Crafting and executing queries upon request of data.  Creating measures and columns with DAX in SSAS & POWER BI DESKTOP.  Experience on Creating Workspaces and Subscriptions.  Published/shared the reports by creating Content Pack/Sharing the PBIX file.  Publishing Dashboards and Reports using Automation Scripts.  Worked on On-Premises Gateway to refresh the data sources/creating a live connection.  Configuration the Gateways.  Experience in Custom visuals and Groups creations.  Maintaining and supporting the reports on Production Server.  Experience in publishing reports to app.powerbi.com and setting up the necessary connection details and scheduling.  Responsible for the analysis, design and development activities.  Connect to different Data sources from Power BI..  SQL experience in querying multiple data sources and multi-join query generation.

## CERTIFICATION

• Data analyst by Udemy 2024

## EDUCATION

• Bachelors degree in Electronics and communication from MGU 2013 - 2017

## LANGUAGES

• English - advanced
