Experience in working with Agile, Scrum and waterfall delivery models

INDUSTRIES: Software and Platforms

TECHNICAL SKILLS

• SAP Analysis for Microsoft Office	11 years
• SAP Analytics and Reporting	10 years
• SAP BW on HANA	10 years
• SAP Core Data Services	8 years
• SAP BPC and EPM	1 years

SOFT SKILLS

Teamwork, Communication, Problem-solving, Critical thinking, Time management

PROJECT DETAILS

• Analytics Architect

Project Description: Design and implement Report mapping and transformation processes to align existing data structures with SAP S/4 HANA requirements. Collaborate with technical teams to develop and execute report conversion scripts and programs. Perform Report validation and reconciliation activities to ensure accuracy during migration.

Responsibilities: Develop and implement comprehensive ERP Analytics strategies for SAP S/4 HANA digital transformation projects, you will be able to articulate and design domain related Reporting and analytics extensions. Build Capability to cover all the aspects of SAP S/4 Reporting & Analytics delivery unit, for Operations, Strategic, Embedded and Data warehouse/data mart/Data lake implementation ERP Data Assessment, Roadmap Discovery support, and eventual data Monetization Ensure the integrity, accuracy, and consistency of data & analytics throughout the implementation process as our CSC resources deliver across different projects. Collaborate with cross-functional teams to define reporting & analytics requirements and standards. Report design, analytics build, information profiling and knowledge of tools and processes used for SAP Reporting & analytics Cloud Datawarehouse Establish and enforce SAP cloud data warehouse (Datasphere) governance policies and procedures. Work closely with business stakeholders to define Reporting & analytics standards and classifications. Build Capability to cover all the aspects of SAP S/4 Reporting & analytics delivery unit, for Data warehouse, Data Lake, Structure Reporting, Embedded reporting and dashboard initiatives Ensure the quality and reliability of Reporting & analytics throughout the project lifecycle.

Technologies: of SAP S/4 Reporting & Analytics delivery unit, for Operations, Strategic, Embedded and Data warehouse/data mart/Data lake implementation ERP Data Assessment, Roadmap Discovery support, and eventual data Monetization

Industry: Software and Platforms

• Analytics Consultant

Project Description: S/4 HANA Reporting across multiple areas using Embedded Analytics Extensively working on reporting using CDS views and consuming them in Fiori

Responsibilities: Developing Consumption, Composite, Basic and Extended Core Data Services Views with joins associations to fulfill the purpose of Reporting. Creating CDS views with Delta enablement for SAP Business Warehouse. Creating CDS views which are OData enabled and can be used across multiple Front-End tools Creating Analytical Queries which can be reported in Fiori tile or Analysis for Office. Expertise in Transport Management and Charm Management Extensively worked on reporting of Functional areas like: Finance, Supply chain management, Material management, Inventory, DMR. Building Reports, dashboards using AO, Fiori, SAC, Design Studio. Strong ABAP on HANA hands on. Configuring and creating Fiori tiles.

Technologies: Embedded Analytics

Industry: Software and Platforms

• Senior Analytics Developer

Project Description: BW on HANA Reporting integrated with SAP ECC After S4 HANA upgrade- BW on HANA Reporting integrated with SAP S4 HANA BW-IP and BPC for financial planning

Responsibilities: Data Modelling Creation and Maintenance of Data Sources Generic, enhancing Data sources, ODP ODQ concepts, InfoObject, InfoSource, DSO, InfoCube, MultiProviders, Process chains, ADSO, Open ODS view, Composite provider, Open Hub Reporting Bex Query, Structures, Restricted and Calculated Key Figures, Bex Analyzer, Workbooks, Query Designer, Analysis for Office. Planning Capacity and Revenue planning using BW IP models, FOX formulas, input-enabled queries, BW IP, BPC upgrade. Worked on HANA modelling & provisioning, Information views, Table Functions, Analytics Privileges, OData Services, HANA security, roles and privileges. Worked on VDMs, HANA live and CDS views. S4 HANA CDS Views with delta enablement, with association with OData Service enabled with Analytics queries Worked in Embedded BW in S4 HANA. Configuring and creating Fiori tiles and applications. Real time cubes, Direct Update DSOs, APDs, Aggregation Levels, Layouts Input Ready Query I have led an assignment which involved moving cold and warm data to Near line storage

Technologies: SAP BW on HANA, SAP HANA

Industry: Software and Platforms

EMPLOYMENT HISTORY

• Analytics Architect February-2019 - December-2024

Description: SAP Reporting & Analytics: Develop and implement comprehensive ERP Analytics strategies for SAP S/4 HANA digital transformation projects, you will be able to articulate and design domain related Reporting and analytics extensions. Build Capability to cover all the aspects of SAP S/4 Reporting & Analytics delivery unit, for Operations, Strategic, Embedded and Data warehouse/data mart/Data lake implementation ERP Data Assessment, Roadmap Discovery support, and eventual data Monetization Ensure the integrity, accuracy, and consistency of data & analytics throughout the implementation process as our CSC resources deliver across different projects. Collaborate with cross-functional teams to define reporting & analytics requirements and standards. Report design, analytics build, information profiling and knowledge of tools and processes used for SAP Reporting & analytics Cloud Datawarehouse Establish and enforce SAP cloud data warehouse (Datasphere) governance policies and procedures. Work closely with business stakeholders to define Reporting & analytics standards and classifications. Build Capability to cover all the aspects of SAP S/4 Reporting & analytics delivery unit, for Data warehouse, Data Lake, Structure Reporting, Embedded reporting and dashboard initiatives Ensure the quality and reliability of Reporting & analytics throughout the project lifecycle. Report Mapping And Transformation Design and implement Report mapping and transformation processes to align existing data structures with SAP S/4 HANA requirements.
