PROJECT DETAILS

• Implementation Development

Project Description: This is an SAP Business Application Studio Consultant
Responsibilities: Engaged in requirements gathering, design, modeling, data provisioning, reporting, CDS Views, and documentation, including CFD creation and field mapping. Participated in the design and development of CDS Views, Virtual tables, Flowgraphs, Replication Tasks, Remote Sources, and Calculation Views for SAC. Established connections, created remote sources, and assigned appropriate roles and privileges in HANA Central. Managed role and object privilege assignments in SAP HANA Cloud and monitored instances in BTP. Conducted multiple testing cycles and provided support for bug fixes.
Technologies: SAP BAS, BTP, S4 HANA, HANA Cloud, and SAC
Industry: Finance

• SAP Consultant

Project Description: We worked in Walgreens Boots Alliance UK with SAP BW4HANA
Responsibilities: Involved in requirements gathering, design, modeling, data provisioning, reporting, and transportation activities of HANA artifacts. Integrated HANA views into BW Composite Providers for use in Bex WEBI Reporting. Designed and developed Multi dimensional Data Models, Info Cubes, Multi Providers, Data Store Objects DSOs, Info Objects, Data Sources, Info Sources, and Transformations. Installed Info Objects, Data Sources, Info Providers, Data Targets, and Info Packages for Master and Transactional Data loading from SAP R 3 Systems to the BI system as per client requirements. Utilized tcode SCTS HTA to collect HANA objects into transport requests. Monitored process chains and job statuses using RSPCM, SM37, and SM50 to identify and resolve issues causing data load failures. Successfully facilitated the Go live phase and provided post Go live handholding. Enhanced performance of Web Intelligence and dashboards with high runtime. Integrated HANA views with reporting tools like Bex, WEBI, and Analysis for Office. Participated in multiple testing cycles and provided ongoing bug fixes. Utilized ALM for defect tracking.
Technologies: SAP HANA 2.0 BW4HANA
Industry: Walgreens Boots Alliance UK

• Development Support/Implementation

Project Description: This is an Business Analyst using the SAP BW BI for Thames Water UK
Responsibilities: Led design, development, and data extraction from R 3 Source system to BI. Modified the existing data model for Info Cubes and DSOs by adding new Characteristics and Key Figures, as well as making changes to transfer rules, update rules, and Infosources. Conducted meetings with Power Users to finalize and freeze requirements. Collected KPI requirements across modules including SD, MM, HR, and FI CO. Monitored process chains and data loads. Utilized Jira for defect tracking.
Technologies: SAP BW/BI 7.3
Industry: Thames Water UK

• Development Support

Project Description: We worked as an SAP BW BO Consultant for Southern Water UK
Responsibilities: Managed changes to the existing design to meet updated user requirements. Worked on Change Requests CRs based on client specifications. Extensively worked with the Data Warehouse Workbench, customizing Info Objects, Info Cubes, DSOs, Data Sources, and Transformations. Uploaded Master and Transaction Data from R 3. Optimized query performance by managing Aggregates, Compression, Partitioning, and Indexing for Info Cubes. Enhanced Data Sources according to customer requirements and developed ABAP programs, Start Routines, End Routines, and Field level Routines. Performed data extraction using LO Cockpit, loaded data from R 3 to BW, and handled Initialization, Delta, and Full updates. Redesigned existing Process Chains for master and transaction data loading from flat files. Managed transport requests TRs and their import sequence across Quality and Production systems. Conducted client meetings and provided updates on CR changes.
Technologies: SAP BW BI 7.3
Industry: Southern Water UK
