• Redux	7 years
• JavaScript	7 years
• React	7 years
• React Native	6 years
• TypeScript	5 years
• Node.js	4 years
• Next JS	4 years

PROJECT DETAILS

• Offside — November-2022 - December-2023

Project Description: Offside is a free social sports app. It provides you with a guided chat platform where you can discuss live matches with your friends. Also, you will get live match updates so you do not miss anything. Additionally, we also post non-money prediction questions at regular intervals, allowing you to compete with your friends and increase engagement with the match. We provides sports fans with Chat platform designed to simplify live sports discussion Prediction events to enhance the match viewing experience Live match updates ensure that fans do not miss anything Chat simplifies participating in multiple groups & individuals during a live match. Non-money predictions enhance the match viewing experience by asking intriguing questions to engage you and your friends. There are weekly rewards based on points earned during that week from predictions. Live match updates are built within the chat and provide ball-by-ball detailed coverage of the match. The Game hub, which is unique to each match, is the heart of our platform, combining all of the features listed above into a single interface. During the game, the platform keeps the conversation going by sending users prediction questions, commentaries, and trivia.

Responsibilities: Fetch requirement from the product manager, helping him providing feedback about UI/UX. Take part in sprint meeting actively ensuring end to end delivery of the task within decided timeline. Helped two junior developers in need of time to get the task completed.

Technologies: React-native

• Camapus Connect July-2021 - April-2024

Project Description: The best way to connect with other students is to discover everything you need to know about your university. With CampusConnect, you can start planning your university adventure even before you arrive. It is all about giving you a head start and helping you navigate those tricky first steps on campus. Become part of the university network, and get access to all the best resources on orientation, how to sort your accommodation, important dates for your calendar, interactive maps, and more. Make new friends and get brilliant advice on university living from people on the inside track. Discover your life ahead. Discuss what is important to you. Plan your new adventure. Connect with fellow students before you arrive

Responsibilities: My responsibility includes connecting with fellow developers/managers in sprint meetings to get the requirements and monitor end-to-end task delivery.

Technologies: React, Node, React-native

Industry: Education
