+91 9820045154 | hr@augmntx.com

Front-End Developer with 6+ years of experience building scalable, high-performance web applications. Proficient in React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, and modern frontend frameworks. Strong expertise in state management (Redux Toolkit, Context API), RESTful API & GraphQL integration, and performance optimization. Hands-on experience with Webpack, Babel, Jest, React Testing Library, and Cypress. Adept at working in fast-paced startup environments, contributing to agile development, and implementing CI/CD pipelines for seamless frontend deployment.

INDUSTRIES: Software and Platforms, Construction

TECHNICAL SKILLS

• CSS	6 years & 2 months
• HTML & CSS	6 years & 2 months
• JavaScript	6 years
• NPM	6 years
• REST APIs	5 years
• Webpack	5 years
• Context API	5 years & 5 months
• Redux	5 years & 5 months
• SASS	5 years & 5 months
• Git	5 years
• React.Js	5 years & 6 months
• TailwindCSS	4 years
• GraphQL	4 years
• Jest	4 years
• Next JS	3 years & 2 months
• Type script	3 years & 2 months

SOFT SKILLS

Teamwork, Communication, Problem-solving, Time management

PROJECT DETAILS

• Fusion Data Secure (FDS) July-2023 - March-2025

Project Description: Fusion Data Privacy Protection is essential for protecting sensitive information from unauthorized access, use, and disclosure, and can help organizations build trust with customers and stakeholders.

Responsibilities: Integrated RESTful APIs into the frontend architecture, enabling seamless interaction with backend systems and enhancing real-time data accuracy across platforms. Implemented real-time monitoring using Socket.io, allowing continuous tracking of data streams and proactive breach detection mechanisms. Visualized security analytics through React Table and Recharts, creating interactive dashboards that provide deep insights into system activity and vulnerabilities. Managed complex application state efficiently with Redux Toolkit, improving scalability and maintainability of the codebase. Optimized data fetching and caching with Tanstack Query, resulting in faster load times, improved performance, and a smoother user experience.

Technologies: React.js, Redux Toolkit, Socket.io, Axios, Tanstack Query,React Table, ReCharts, etc

Industry: Software and Platforms

Link: https://www.fusiondatasecure.com/

• MyTruckboss March-2024 - April-2025

Project Description: myTruckBoss is a mobile app and web portal that allows the Contractor to track his/her trucking cost without involvement from Hauler/Driver. The subscription includes a mobile app and web portal to access/share your data via an excel file or pdf.

Responsibilities: Engineered and maintained scalable admin and client portals using Next.js, enhancing platform usability and client-side performance. Integrated RESTful APIs with Tanstack Query to streamline data fetching, caching, and synchronization - reducing system lag by resolving three key performance bottlenecks. Elevated user engagement by 25% through the use of Tailwind CSS, React Table, and dynamic UI components tailored for seamless user interactions. Managed complex application state using Redux Toolkit, ensuring consistent state management across multiple modules. Ensured cross-browser compatibility and delivered a responsive, high-performance UI across all major devices and screen sizes.

Technologies: Next.js, Redux Toolkit, Axios, Tanstack Query, etc

Industry: Construction

EMPLOYMENT HISTORY

• Frontend developer August-2021 - January-2025

Description: API Development & Integration: Designed and integrated RESTful APIs to streamline data exchange between frontend and backend systems, achieving a 40% improvement in response time. Frontend Development: Built dynamic and responsive web applications using HTML, CSS, JavaScript, TypeScript, React.js, and Next.js, ensuring 100% cross-browser compatibility and high user engagement. Responsive Design Implementation: Created adaptive UI/UX designs to support seamless access across devices, reducing mobile navigation-related support tickets by approximately 40%. Version Control & Collaboration: Utilized Git and Bitbucket for efficient version control and repository management, ensuring 99% uptime and enhancing team collaboration. Agile Development: Successfully managed individual development tasks across four major releases within agile workflows, decreasing personal debug time by over 60%. Task Management: Leveraged Jira for effective task tracking, prioritization, and progress monitoring, contributing to a 15% boost in team task completion rates.

• Frontend developer January-2020 - August-2021

CodeZee Solutions

Description: RESTful API Development: Engineered high-performance APIs to optimize data exchange and minimize load times, enhancing overall service efficiency by 30%. UI/UX Engineering: Developed interactive and responsive user interfaces using HTML, CSS, JavaScript, TypeScript, and React.js, contributing to a 20% improvement in customer satisfaction. Admin Panel Implementation: Designed and launched a scalable Admin Panel, streamlining operational workflows and improving management efficiency by 40%. Code Quality & Best Practices: Conducted regular code reviews and enforced coding standards, resulting in a 25% boost in team productivity and application stability.

• Frontend developer February-2018 - December-2019

NetizensTech

Description: Improved application load times by 20% through API implementation for seamless frontend-backend communication. Designed responsive layouts using HTML, CSS, JavaScript, TypeScript, and React.js, increasing mobile traffic by 30%. Achieved 100% cross-browser consistency, leading to a 15% increase in user retention.

CERTIFICATION

• Bachelor of Engineering by GTU 2017

EDUCATION

• Bachelors degree in Electronics and communication from GTU 2013 - 2017

LANGUAGES

• English - advanced
