Results-driven Automation Test Engineer with over 8+ years of experience in designing, developing, and executing automated test frameworks for mobile and web applications using Cypress, Playwright, JavaScript, and RESTful APIs. Proven expertise in mobile automation testing for both Android and iOS platforms.Skilled in modern front-end frameworks like Next.js and Angular.js, with a keen eye for ensuring flawless UI and functional consistency. Adept at working in Agile environments, collaborating with cross-functional teams including DevOps and development, and ensuring top-tier software quality and reliability. Passionate about driving continuous improvement and optimizing CI/CD pipelines for fast, reliable releases

INDUSTRIES: Software and Platforms

TECHNICAL SKILLS

• Automation Testing	10 years
• Selenium	10 years
• Next.JS for UI testing	10 years
• Angular.JS for UI testing	10 years
• Cypress	8 years
• Playwright	4 years

PROJECT DETAILS

• Grindr, Social Networking App — February-2022 - November-2023

Project Description: Built and executed test strategies for chat, profiles, and geolocation services across Android and iOS

Responsibilities: Developed mobile automation suites with Appium and WebDriverIO, running via Jenkins CI. Validated RESTful APIs with Postman and Swagger, ensuring fast and secure data exchange. Collaborated with cross-functional teams in Agile environments using Jira and TestRail..

Technologies: :JavaScript, TypeScript, Appium, WebDriverIO, Jenkins, Espresso, Postman, Pytest, TestRail , Angular.js

Industry: Software and Platforms

• TIRA, Cosmetic and Grooming Website — March-2024 - March-2025

Project Description: Designed and executed cross-platform test strategies ensuring optimal user experience across web and mobile.

Responsibilities: Automated UI test cases using Cypress and WebDriverIO, integrated with GitHub Actions and Jenkins for CI/CD. Performed payment gateway testing ensuring PCI DSS compliance, using Postman for RESTful API validation. Collaborated with developers and product teams in Agile sprints using Jira and TestRail for issue tracking and reporting

Technologies: JavaScript, Cypress, Appium, WebDriverIO, Postman, Jenkins, TestRail, GitHub Actions , Next.js

Industry: Software and Platforms

• LatitudePay - Buy Now, Pay Later

Project Description: Designed test frameworks covering user onboarding, payment flows, and installment setups.

Responsibilities: Automated end-to-end and API tests using Appium, WebDriverIO, and Postman. Performed PCI DSS compliance testing and load testing using Dockerized environments. Managed continuous test execution via GitLab CI pipelines integrated with Jenkins

Technologies: JavaScript, Appium, Postman, RESTful APIs, Docker, GitLab, Jenkins, Espresso

Industry: Software and Platforms

• B-Spot - Mobile Games Community

Project Description: Developed automation strategies for game modules, payment logic, and multiplayer sync.

Responsibilities: Leveraged Appium and Cypress for test automation across Android, iOS, and web platforms. Performed security, regression, and cross-device testing under high concurrency scenarios. Followed Agile methodologies and used Jira/TestRail for test cycle management.

Technologies: JavaScript, Appium, Espresso, WebDriverIO, Cypress, Jenkins, JIRA, Payment Gateway Integration

Industry: Software and Platforms

EDUCATION

• Masters degree in MCA from DAVV 2012 - 2014

LANGUAGES

• English - advanced
