MuleSoft Developer with 3+ years of experience in designing and implementing API-led integration solutions using the Anypoint Platform. Proficient in building RESTful APIs with RAML, integrating systems using connectors like HTTP, MQ, FTP, and handling complex transformations with DataWeave. Skilled in debugging, error handling, scheduler management, and participating in CI/CD pipelines. Strong team player with hands-on experience in UAT, production support, and end-to-end SDLC processes.

INDUSTRIES: IT services

TECHNICAL SKILLS

• Anypoint Studio	3 years & 2 months
• Anypoint Platform	3 years & 2 months
• Postman	3 years & 2 months
• Github	3 years & 2 months
• Cloudhub	3 years & 2 months

SOFT SKILLS

Effective Communication, Problem-solving, Adaptability, Time management, Critical thinking

PROJECT DETAILS

• MFCS Process API

Project Description: This interface facilitates the following functions. Processing the acknowledgment of a buyer-generated order without changes. Processing the acknowledgment of a buyer-generated order with modifications to date, quantity, or cost.
Responsibilities: Experienced MuleSoft Developer with a strong background in designing and implementing RESTful APIs using RAML and Anypoint Platform. Proficient in integrating systems using Mule Connectors like HTTP, Database, FTP/SFTP, and Anypoint MQ. Skilled in API management, performance testing, debugging, and monitoring through Anypoint tools. Actively involved in UAT, scheduling, and re-triggering failed requests to ensure reliable integration workflows.
Technologies: Mule 4, Anypoint studio, Anypoint Platform, Mule ESB.
Industry: IT services

• Products Info Process API

Project Description: The API grants access to resources associated with product records, which are regularly updated from the system of records (MFCS). It facilitates the seamless transfer of backroom product information from MFCS to the retail cloud.
Responsibilities: Proficient in gathering requirements and translating business needs into MuleSoft integration solutions. Experienced in debugging, accessing Mule message attributes, and implementing error handling for smooth operations. Developed Mule interfaces using connectors, scopes, filters, and components to support diverse integration scenarios. Actively involved in testing, deployment (manual & CI/CD), and managing message queues and schedulers for reliable performance.
Technologies: Mule 4, Anypoint studio, Anypoint Platform, Mule ESB.
Industry: IT services

EMPLOYMENT HISTORY

• Mulesoft Developer

Description: Software Engineer with 3+ years of experience in the IT industry, specializing in MuleSoft-based integration solutions. Skilled in designing, developing, and deploying APIs using RAML on the Anypoint Platform. Experienced in building Mule ESB projects with connectors like HTTP, Anypoint MQ, and using DataWeave for complex transformations. Adept at integrating systems such as cloud databases and SAP-ECC, and implementing error handling, flow controls, and routing strategies. Strong understanding of SDLC, CI/CD pipelines using GitHub and AWS DevOps, and providing production support. A reliable team player with excellent problem-solving and interpersonal skills.

CERTIFICATION

• Dowla Kola by JNTUA 2022

EDUCATION

• Bachelors degree in Civil from JNTUA 2019 - 2022

LANGUAGES

• English - intermediate
