I have an 8+ years of experience as an account manager with an PHP Laravel, MySQL, HTML/CSS, JavaScript, Bootstrap. Designed and managed database schema using MySQL. Implemented user authentication, role management, and secure payment flow.

INDUSTRIES: IT services, Ecommerce

TECHNICAL SKILLS

• .NET	3 years & 5 months
• PHP	1 years
• Laravel	1 years
• Node.js	1 years & 2 months
• Java	7 months

PROJECT DETAILS

• Employee Management System (EMS)

Project Description: A web-based application developed for managing employee records, attendance, salary processing, and performance reviews within an organization. The system offered role-based access for Admins, HR, and Employees, including dashboards, reporting modules, and secure authentication.
Responsibilities: Designed and developed backend APIs using .NET Core and Entity Framework. Integrated SQL Server for data handling and complex queries. Implemented frontend using Bootstrap and Razor pages. Conducted unit testing and bug fixing. Deployed the application on the internal server and provided documentation.
Technologies: .NET, C#, Entity Framework, SQL Server, Bootstrap
Industry: IT services

• E-Commerce Website for Local Retail

Project Description: An e-commerce platform designed for a local electronics retailer to showcase and sell products online. The site includes product listings, search and filter options, shopping cart, payment integration, order tracking, and an admin dashboard for inventory management.
Responsibilities: Built backend logic and APIs using Laravel. Designed and managed database schema using MySQL. Implemented user authentication, role management, and secure payment flow. Handled front-end development with Bootstrap and custom JavaScript. Coordinated with client for UI/UX feedback and deployed the final solution.
Technologies: PHP Laravel, MySQL, HTML/CSS, JavaScript, Bootstrap
Industry: Ecommerce
