PROJECT DETAILS

• certificate-system — April 2022 - August 2023

Project Description: Pioneered an NFT-based document verification system adopted by Mumbai's top security printer and Masters' Union as SaaS to issue and verify degree certificates on the Polygon blockchain, effectively solving the problem of fake certificates for over 500 students
Responsibilities:
Technologies: Next.js, React.js, Node.js, mongoDB, Solidity, REST APIs
Industry: Blockchain

• Loop April 2022 - August 2023

Project Description: Designed and engineered a sustainable smart-visiting card e-commerce store to promote sustainability and boost networking productivity that allows users to effortlessly share their profile using a branded QR code or a simple NFC tap.
Responsibilities:
Technologies: Next.js, React.js, Node.js, mongoDB, Tailwind CSS
Industry: Ecommerce

EMPLOYMENT HISTORY

• Co-Founder and CTPO April 2022 - August 2023

Description: Co-Founder and CTPO at Alphamint Labs, pioneering an NFT-based document verification system, a smart-visiting card e-commerce store, and multiple MVPs for diverse Web2.5 and Web 3.0 applications. Successfully raised 60,000 USD in the form of CCDs and built a team of 8 including sales, marketing, UI/UX, and developers to pursue our vision and take projects from concept to successful execution.

• Software Consultant August 2016 - June 2021

Oracle
Description: Played a pivotal role in the Data Migration project of Jibun Bank, Tokyo, both onsite and offshore. Developed core banking customizations on Oracle Flexcube for international banks. Acted as a Single Point of Contact between the client and the development team.
