Highly focused software developer with 5+ years of experience in web app development. Organised, detail-oriented, and committed to writing solid code. Skilled in understanding client requirements and ensuring clear project communication for lasting business relationships.

INDUSTRIES: media

TECHNICAL SKILLS

• Node.js	5 years
• Next.js	4 years
• PostgreSQL	4 years
• Nest js	2 years
• NA	1 years

PROJECT DETAILS

• OnePic

Project Description: Developed an innovative platform, OnePic, that utilizes AI for image generation and enables users to create personalized products with their generated images. Implemented features allowing users to preview their designs on various products, place orders, and have them printed and delivered. Contributed as a backend developer, leveraging technologies such as Node.js, Express.js, Sequelize, and MySQL, while the frontend was built with React.js and MUI.
Responsibilities: Designed and developed both the backend and frontend of the platform using Node.js, Express.js, Sequelize, MySQL, React.js, and MUI. I created RESTful APIs for AI image generation, user authentication, and order processing, and built responsive user interfaces for product previews and order management. Additionally, I managed database design and optimization, integrated AI-generated images into product templates, and collaborated with cross-functional teams to ensure a seamless user experience while conducting thorough testing and debugging to enhance performance and scalability.
Technologies: NodeJs, MySql, Sequelize, Express.js, Typescript, Reactjs, MUI.
Industry: media

• Schedulewood

Project Description: A comprehensive movie and TV show management platform, inspired by Jira's project management functionality. Schedulewood allows users to track, manage, and organize media content efficiently. Key features include content scheduling, progress tracking, team collaboration, and detailed analytics to optimize viewing schedules and production timelines.
Responsibilities: As a full-stack developer for the Schedulewood project, I designed and developed both frontend and backend components using Next.js, Redux, React Query, Node.js, and MongoDB. My responsibilities included building a responsive and user-friendly interface for content management, creating robust APIs for data operations, and optimizing the application for performance and scalability. I collaborated closely with the design team to ensure a seamless user experience, integrated third-party APIs to enhance platform capabilities, and maintained high-quality code through regular code reviews, debugging, and testing.
Technologies: NodeJs, NextJs, MongoDB, Mongoose, Typescript, Tailwind, MUI.
Industry: media

EMPLOYMENT HISTORY

• AM - Business Development January-2024 - February-2025

Description: Full stack Developer

EDUCATION

• Bachelors degree in Science from AKTU 2015 - 2019

LANGUAGES

• English - advanced
