This New York-based QA Lead brings over a decade of IT experience, specializing in software quality assurance. They possess a strong track record of leading teams, developing robust automation frameworks, and implementing efficient CI/CD pipelines. Their expertise spans web, client/server, Salesforce, and API testing, demonstrating a commitment to process optimization and high-quality software delivery. They are well-versed in various testing tools and methodologies, including Agile and Scrum, and have a solid foundation in backend database testing.

INDUSTRIES: Real Estate, Technology

TECHNICAL SKILLS

• QATesting	7 years
• Selenium	7 years
• Automation Testing	7 years
• Cypress	7 years
• Playwright	7 years

PROJECT DETAILS

• WeWork June-2018 - December-2020

Project Description: WeWork is a company that provides shared workspaces, community, and services for entrepreneurs, freelancers, startups, small businesses, and large enterprises. Founded in 2010, WeWork initially focused on creating co-working spaces that offer flexible office solutions, allowing companies and individuals to rent desks or private offices on a month-to-month basis.

Responsibilities: Mentored developers, product owners, and engineering managers on quality testing practices. Enabled and monitored quality improvement processes for a large engineering team. Developed and implemented UI test frameworks (Selenium/Browserstack, Puppeteer) using TypeScript and JavaScript. Created API testing solutions (Ruby/RSpec) for backend applications. Developed and maintained automated test scripts. Integrated testing into CI/CD pipelines using CircleCI. Integrated XML test suites with Jenkins server for scheduled automation. Defined project requirements, budgets, and formed project teams. Monitored project progress, resolved issues, and provided progress reports. Developed QA processes, strategies, and procedures. Defined project milestones. Performed manual and automated testing on Salesforce applications. Conducted RESTful API testing (Rest-Assured, Postman). Validated sanity, functional, integration, and regression test suites. Employed Test Driven Development methodologies.

Technologies: Ruby, Ruby mine, Agile/Scrum, Selenium WebDriver, Cucumber, JMeter, HTML5, TestNG, Javascript, Agile, Jira, MySQL, Postman, SoapUI, Git, CircelCI, JMeter, Load Runner, Rest Assured, Appium, Android, IOS, JMeter

Industry: Real Estate

• QA

Project Description: Justworks is a cloud-based platform that takes the busyness out of growing a business and alleviates the unknown. It is a simple platform with the power of a PEO to give access to corporate-level benefits, seamless payroll, HR tools, and compliance support all in one place.
Responsibilities: Led QA teams in Brazil and the USA, establishing web automation frameworks (Cypress/JavaScript) and CI/CD pipelines (CircleCI). Improved product quality and reduced defects through enhanced testing processes and framework adoption. Implemented CI/CD automation for HR SaaS platforms using CircleCI, Docker, and Cypress. Spearheaded API testing framework development to validate service communication, improving deployment speed. Enhanced regression suites with parallel testing, boosting performance. Managed Salesforce testing strategies (functional, regression, UAT, automation). Supervised quality teams, ensuring thorough testing and collaboration. Addressed customer performance and quality issues, working with engineering teams. Tested REST services using Rest Assured. Led accessibility testing POCs (WCAG guidelines). Collaborated with product owners on enhancements and strategies. Prepared functional specifications and managed E2E functional testing. Validated store images and data migration. Automated business scenarios using TOSCA, improving test coverage.
Technologies: JavaScript, Selenium WebDriver, Cucumber, Rest Assured, Xray, HTML5, TestNG, Agile, UNIX, Jira, MySQL, Postman, SoapUI, Git, Jenkins, Load Runner, Appium, Android, IOS, JMeter, CircleCI, Github Actions, Confluence, Jira, AWS
Industry: Technology

EMPLOYMENT HISTORY

• QA Engineer

Description: Led QA teams in Brazil and the USA, establishing web automation frameworks (Cypress/JavaScript) and CI/CD pipelines (CircleCI). Improved product quality and reduced defects through enhanced testing processes and framework adoption. Implemented CI/CD automation for HR SaaS platforms using CircleCI, Docker, and Cypress. Spearheaded API testing framework development to validate service communication, improving deployment speed. Enhanced regression suites with parallel testing, boosting performance.

• QA SDET June-2018 - December-2020

Wework
Description: • Working with multiple teams to achieve product quality through testing practices by mentoring developers, POM’s, engineering managers • Spearheaded process excellence by enabling 40+ engineers for quality improvement and monitoring processes • Driving end to end UI test framework in Selenium/Browserstack & Typescript with CI/CD pipelines using Circle CI to be used by engineering teams for a web-based project that decreased manual effort by 80%

EDUCATION

• Masters degree in Computer Engineering from New York university 2015 - 2017

LANGUAGES

• English - advanced
