With six years of experience as a software developer, specializing in front-end development and UI/UX design, I am passionate about creating amazing digital experiences that seamlessly blend aesthetics and functionality As a front-end developer , I have a pretty good understanding of web technologies and frameworks, allowing me to craft engaging and responsive user interfaces. I have successfully collaborated on numerous projects, leveraging my expertise in HTML, CSS, JavaScript, and popular front-end frameworks like VueJS /NuxtJS, NextjJS. In parallel to my development skills, I am also a UI/UX designer. I believe that user-centric design is the key to any successful digital product. By conducting user research, wireframing, and prototyping, I create visually appealing and intuitive interfaces that enhance the overall user experience. In addition to my front-end skills, I have pretty good experience in mobile app development, particularly with Flutter. Flutter's cross-platform capabilities allow me to build high-performance and visually appealing mobile applications for both iOS and Android platforms. Through Flutter, I leverage my knowledge of Dart programming language to create efficient and robust mobile apps that provide a delightful user experience. If you are seeking a skilled software developer with expertise in front-end development, UI/UX design, and mobile app development with Flutter, I would be thrilled to connect with you. Let's explore how we can collaborate to create outstanding digital solutions across web and mobile platforms.

INDUSTRIES: Banking and Finance, Utilities, HealthTech
