I am a Full-Stack software developer with keen interest in backend development and software architecture. I've had the opportunity to work with clients in healthcare, fintech, e-commerce, hyperlocal, and more. We are proud to have developed expertise in a variety of technologies such as NodeJs, Vue, React, Flutter, NestJs, NextJs, GraphQL, Serverless, Python, and other essential APIs that are necessary in building software solutions in these domains.

INDUSTRIES: FinTech, Logistics, Healthcare, Service Business

TECHNICAL SKILLS

• Android Studio	7 years
• Vue.js	7 years
• MongoDB	7 years
• Serverless	7 years
• Flutter	7 years
• Node.js	7 years
• GraphQL	6 years
• NestJs	6 years
• Python	5 years
• React	4 years
• Next JS	4 years

SOFT SKILLS

Teamwork, Critical thinking, Problem-solving, Consulting

PROJECT DETAILS

- Fintech Platform

Project Description: The platform enables the user to login and apply for loans. The platform has integrations with various APIs like Banks, Credit Bureau, MCA, GST using which data is fetched for automated assessment of the application and loan disbursals.
Responsibilities: We were responsible for the entire architecture, management and development of the project. We worked closely with the founders for brainstorming multiple use cases and workflows and providing them an optimised user journey.
Technologies: Django, NodeJs, NuxtJs, Flutter, AWS Lambda, CockroachDB
Industry: FinTech

• Hyperlocal Delivery Platform

Project Description: The project consisted for mobile apps built for users and delivery partners and web application for admin side. The software had integration with Google Maps Distance Matrix API and allowed users to create orders for hyperlocal delivery. The order creation had a bidding process for the delivery executives to bid for the order and complete the same, and also had a automated allocation algorithm for automated assigning.

Responsibilities: We were responsible for design and development of the complete project with requirement analysis from the founders and stakeholders and development of the UX flow and the software.

Technologies: NestJs, NuxtJs, Flutter, AWS, MongoDB

Industry: Logistics

• DigiSehat

Project Description: The project was targeted for healthcare professionals, mainly doctors, radiologists, and lab technicians for onboarding patients into the system, creating test and adding the results for the test and ultimately creating reports for the test results. The doctors had a Speech to Text feature wherein the doctor to dictate his finding and the system captured it, creating reports in the process.

Responsibilities: We were responsible for design and development of the complete project with designing intricate flows as per the information given to us by stakeholders.

Technologies: NestJs, Postgres, GCP Cloud Run, NuxtJS

Industry: Healthcare

• Custom CRM

Project Description: Custom Made CRM Software for Internal Usage of client company which keeps track of their customer bookings, bookings fulfilment and invoice and proposal generation

Responsibilities: UI Development and Integration with backend, along with part s of backend development, database desgin and software architecture

Technologies: Nuxt, NestJs

Industry: Service Business

EMPLOYMENT HISTORY

• Founder and Technical Lead

Description: Technical Lead, Software Architect, Client Handling and Project Management.

CERTIFICATION

• Android Certification by Asterix Solution 0

• Hadoop Certification by Asterix Solution 0

• Machine Learning Nanodegree by Udacity 0

EDUCATION

• Bachelors degree in Computer Scient from Mumbai 2015 - 2018

LANGUAGES

• English - native
