A dedicated Sr. PHP Developer with over 4 years of experience in crafting web solutions. Proficient in PHP, CodeIgniter, Laravel, and MySQL, I have successfully delivered 20+ projects, including dynamic websites, CMS systems, and real estate management portals. My passion for coding and commitment to excellence drive me to create efficient, user-friendly applications. With a B.Sc. in IT and a strong technical skill set, I am ready to tackle new challenges and contribute to innovative projects in the software development field.

INDUSTRIES: Automobile, Technology, Real Estate, Non Profit, Finance, Education

PROJECT DETAILS

• TestDriveGuru

Project Description: TestDriveGuru is a web platform designed for generating inquiries about used cars and facilitating car purchases. It offers a user-friendly interface for car buyers and sellers to connect efficiently.

Responsibilities: As a key member of the development team, I contributed to the project by leveraging PHP and Laravel to create a robust and secure system. My responsibilities included database design, implementing user authentication, and optimizing website performance.

Technologies: PHP, Laravel, MySQL

Industry: Automobile

• Avlock India

Project Description: Avlock India is an ongoing project focused on developing a company website with a content management system (CMS). The CMS enables easy content updates and management, ensuring that the website remains dynamic and up-to-date.
Responsibilities: In my role, I have been actively involved in using PHP and CodeIgniter to build the CMS functionality. I've also worked on database integration, allowing seamless content publishing and editing by authorized personnel.
Technologies: PHP, Code Igniter, MySQL
Industry: Technology

• RVL

Project Description: RVL is a comprehensive Real Estate Leads Management Portal accompanied by a mobile app. This platform streamlines the process of managing real estate leads, making it easier for professionals in the industry to track and convert potential clients.
Responsibilities: I played a significant role in developing this system using PHP and Laravel. My responsibilities included designing the database schema, implementing lead tracking features, and ensuring the mobile app's seamless integration with the web portal.
Technologies: PHP, Laravel, MySQL
Industry: Real Estate

• CSSY

Project Description: CSSY is a website dedicated to facilitating donations for a noble cause. It provides a user-friendly platform for individuals and organizations to contribute towards charitable initiatives.
Responsibilities: As part of the development team, I utilized PHP and CodeIgniter to create the donation system. My tasks included designing the user interface, implementing secure payment gateways, and ensuring a smooth donation process.
Technologies: PHP, Code Igniter, MySQL
Industry: Non Profit

• Investmentguruindia

Project Description: Investmentguruindia is an Investment News Portal that delivers up-to-date information on financial markets and investment opportunities. It serves as a valuable resource for investors seeking market insights.
Responsibilities: My role in this project involved developing various features using PHP and CodeIgniter. I contributed to the design of the user interface, implemented news feed functionality, and ensured seamless navigation for users.
Technologies: PHP, Code Igniter, MySQL
Industry: Finance

• ICSEmaths

Project Description: ICSEmaths is an educational platform offering study materials and coaching services for students. It aims to provide comprehensive support to students preparing for ICSE mathematics exams.
Responsibilities: I was responsible for the development of this platform using PHP and Laravel. My tasks included creating an interactive learning environment, integrating payment gateways for subscriptions, and optimizing the website's performance.
Technologies: PHP, Laravel, MySQL
Industry: Education

• CEC

Project Description: CEC (Chabad Early Childhood) is a multifaceted portal that encompasses director membership management, donation modules, educational resources, and recurring payments. It caters to the needs of a diverse user base.

Responsibilities: In my capacity as a developer, I utilized PHP and CodeIgniter to build the different modules of CEC. I contributed to membership management, donation processing, and the integration of educational resources, ensuring a seamless user experience.

Technologies: PHP, Code Igniter, MySQL

Industry: Education

EDUCATION

• Bachelors degree in IT from University 2012 - 2015

LANGUAGES

• English - intermediate
