I am versatile and accomplished software developer and designer with extensive expertise in UIUX design, Logo creation, and full stack web and mobile application development. Proficient in leveraging modern technologies to deliver innovative, user centric, and scalable solutions tailored to client requirements. Technical Expertise UIUX Design: Skilled in creating intuitive and visually engaging user interfaces. Tools: Figma, Adobe XD, Sketch, Photoshop, Illustrator. Expertise in wireframing, prototyping, and user research to enhance usability. Logo Creation: Adept at designing impactful brand identities and creative logos. Tools: Adobe Illustrator, CorelDRAW, Canva, Affinity Designer. Focused on delivering designs that resonate with target audiences. .NET Development: Comprehensive experience in developing enterprise-grade applications using: ASP.NET MVC ASP.NET Core Web API and WCF Entity Framework (EF) and LINQ Proficient in C#, Razor Pages, and Blazor for interactive web applications. Skilled in using SQL Server for backend database solutions. Angular Development: Expertise in building dynamic, single page applications (SPAs) using Angular. Proficient in Angular Modules, Components, Directives, and Services. Skilled in RxJS for reactive programming and NgRx for state management. Hands on experience with RESTful APIs and Angular Material. Flutter Development: Proficient in building cross-platform mobile applications using Flutter and Dart. Expertise in custom widgets, state management (Provider, Riverpod), and Firebase integration. Strong focus on performance optimization and seamless UI design. React Native Development: Skilled in developing cross platform mobile applications using React Native. Proficiency in building reusable components and implementing efficient navigation with React Navigation. Expertise in managing state using Redux and Context API. Hands on experience with native modules, integrating APIs, and deploying apps to the App Store and Google Play. Focused on performance optimization and ensuring smooth animations and transitions. Combining creative design capabilities with technical prowess, I aim to deliver solutions that not only meet but exceed user and business expectations.

INDUSTRIES: Account Application, Human Resource Management System, Clothing, Manufacturing

TECHNICAL SKILLS

• Logo Design	5 years & 2 months
• UI UX designs	5 years & 2 months
• .NET	3 years & 4 months
• Angular	3 years & 4 months
• React Native	3 years & 2 months
• Flutter	3 years & 2 months

SOFT SKILLS

Communication, Teamwork, Problem solving, Critical thinking, Time management

PROJECT DETAILS

• Bill Soft Comprehensive accounting November-2023 - September-2024

Project Description: The objective of Bill Soft was to develop a robust, user-friendly accounting system tailored for small to medium-sized businesses. The system aimed to streamline financial operations, including invoice generation, expense tracking, inventory management, and financial reporting.
Responsibilities: Full Stack Developer Angular and .NET Spearheaded the development of an intuitive accounting platform by integrating Angular for responsive frontend interfaces and .NET for robust backend services. Successfully implemented performance-optimized features that enhanced workflow efficiency and decreased users financial processing efforts by approximately 30%
Technologies: Angular, .Net, SQL
Industry: Account Application
Link: https://www.billsoft.in

• Comprehensive Payroll October-2024 - December-2024

Project Description: The Payroll Management System is a robust and efficient application developed using Angular for the frontend and .NET for the backend, designed to streamline and automate payroll processing for organizations. This system simplifies complex payroll operations, ensuring accuracy, compliance, and timely salary disbursement for employees.
Responsibilities: As a Full Stack Developer leveraging Angular for the frontend and .NET for the backend, I played a pivotal role in building a seamless and efficient accounting solution. Delivered a streamlined accounting solution that reduced financial processing time by 30% for users.
Technologies: Angular, .Net, SQL
Industry: Human Resource Management System

• Expert in Logo Design April-2025 - April-2025

Project Description: I am a passionate logo designer. My approach combines creativity, modern aesthetics, and brand identity understanding to craft logos that resonate with the brand's vision.
Responsibilities: I ensure every design is: Unique and Tailored to the Brand Identity Aligned with the client's requirements and expectations Created with 100% originality and ownership rights Delivered with high quality formats suitable for digital, print, and branding needs.
Technologies: Adobe Illustrator
Industry: Clothing

• Pixel Perfect UI/UX Expert April-2025 - April-2025

Project Description: As UI/UX Designer with expertise in creating intuitive, user centric digital experiences that blend functionality with aesthetics. Skilled in wireframing, prototyping, and interactive design using tools like Figma, Adobe XD, and Sketch.
Responsibilities: I specialize in designing modern, minimalist, and responsive interfaces for mobile apps, websites, and web applications. With a deep understanding of user behavior, design principles, and usability, I aim to deliver seamless user experiences that enhance brand identity and drive user engagement.
Technologies: UI Wireframes and Mockups
Industry: Manufacturing

EMPLOYMENT HISTORY

• Web designer

Description: Designed intuitive and visually engaging user interfaces for web and mobile applications, focusing on seamless user experiences. Conducted user research and usability testing to inform and optimize design decisions. Created wireframes, prototypes, and user flows to effectively communicate design concepts. Collaborated with cross-functional teams, including developers and product managers, to ensure design alignment with project goals. Crafted unique, impactful logos that accurately represented client brand identities and ensured scalability across platforms. Delivered multiple design concepts to stakeholders and refined designs based on feedback. Utilized tools like Figma, Adobe XD, Sketch, Photoshop, and Illustrator to produce high-quality designs. Ensured compliance with design standards and best practices while meeting tight deadlines.

• Senior Software Engineer

Encrypted Infoweb

Description: Developed and maintained scalable web applications using .NET Core and ASP.NET MVC frameworks, delivering high performance backend solutions. Designed and implemented single-page applications (SPAs) with Angular, utilizing RxJS and Angular Material for dynamic, responsive user interfaces. Built cross-platform mobile applications using Flutter and React Native, focusing on custom widgets, state management (Provider, Redux), and seamless performance. Collaborated with cross-functional teams to ensure alignment with project requirements, optimizing workflows and delivering quality software. Integrated RESTful APIs across multiple platforms and ensured robust application security and scalability. Managed source control and deployment pipelines using Git and CI/CD tools. Stayed updated on the latest development trends to incorporate best practices and improve efficiency.

EDUCATION

• Masters degree in Computer Applications from Saurashtra University 2017 - 2019

• Bachelors degree in Computer Applications from Saurashtra University 2014 - 2017

LANGUAGES

• English - advanced
