I am Acquia Certified site builder having 7 yrs of experience in developing Drupal modules. Worked on content moderation, workflows, views, taxonomy and layout builders. Exposed and consumed Rest APIs in Drupal, worked on Decoupled Drupal. Developed modules for creating queues, custom crons for handling batch operations. Created custom forms based on the requirements. Provided services to various domains like healthcare, medical, banking.

INDUSTRIES: chipset, Agricultural, Healthcare, Banking, EdTech, HealthTech

TECHNICAL SKILLS

• Drupal	8 years & 6 months
• HTML	5 years
• CSS	5 years
• JavaScript ES6	3 years
• jQuery UI	3 years

PROJECT DETAILS

• Qualcomm July-2021 - December-2022

Project Description: Developed on Drupal 9, implemented custom entities for document handling, built Views for role-based content display, and enhanced backend functionality with custom modules.
Responsibilities: I have demonstrated proficiency in Drupal by creating diverse content types and effectively organizing them into groups using the Views module, enhancing content management and presentation capabilities for various web projects. Utilized advanced Twig templating techniques to customize the presentation layer of Drupal websites, including the customization of pages, views, and blocks, ensuring seamless integration with design requirements and optimal user experience.
Technologies: Drupal 7
Industry: chipset

• Bayer December-2022 - April-2024

Project Description: Built on Drupal 10 with a multisite architecture, developed custom entities for region-specific content, configured multilingual workflows, and implemented editorial Views and permissions.
Responsibilities: Worked with Bayer, a leading company specializing in pharmaceuticals and agrotech domains, to deliver tailored solutions and support. Managed a multi-site Drupal web domain utilized by Bayer. I have extensive experience working with the Views, Webform, and Paragraphs contributed modules in Drupal, enabling me to efficiently create dynamic content displays, customizable forms, and structured content layouts I have proficiently managed translations, taxonomy structures, and administrative configurations within Drupal, leveraging Drush commands to streamline development workflows and enhance efficiency across the project. Developed custom modules in Drupal 7, 9, and 10 in multiple versions of the Drupal platform Designed and implemented custom forms, content types, blocks and developed several REST APIs, tailored to specific project requirements.
Technologies: Drupal 10, css, js, git, composer, twig
Industry: Agricultural

• TEAM

Project Description: Description: TEAM is a part of Better health Data. This TEAM program is for teenagers aged between 13 - 17 years. This is a program to track daily activities for fitter and healthier lifestyle. This is a obesity control program in which any teenager can join.
Responsibilities: Created questionnaire forms for participants. Client-side jQuery validation for forms. Questionnaire theming and jQuery interface. Theming of survey page and questionnaire forms. Drupal - Moodle integration to watch videos from moodle in drupal site. Moodle Theming. Clicksend API to send automate sms to registered participants.
Technologies: Drupal 7, PHP , MySQL
Industry: Healthcare

• Citi

Project Description: Developed using Drupal 10 (backend only) with custom entities for financial products, exposed REST APIs for a React frontend, and implemented secure access control and caching.
Responsibilities: Working on a Decoupled Drupal website. Managed custom queue workers, optimizing asynchronous processing of tasks such as file uploads, API calls, and content migrations. Designed and developed custom entities to support business-specific content structures. Created and maintained custom queues to handle high-volume tasks efficiently, ensuring reliable and scalable background processing. Developed a robust workflow using Drupal Content Moderation module, streamlining the content approval process and ensuring compliance with editorial standards. Collaborated with front-end developers to ensure seamless integration between the Drupal backend and decoupled frontend applications. Utilized best practices for Drupal development, including coding standards, security protocols, and performance optimization. Actively contributed to troubleshooting and resolving issues related to queue processing, content workflows, and data synchronization.
Technologies: Drupal 10,git, composer, twig
Industry: Banking

• Vuforia

Project Description: Built on Drupal 9, created custom entities for courses and assessments, developed role-based dashboards using Views, and implemented custom modules for learning workflows.
Responsibilities: Successfully led the migration project from Adobe Experience Manager (AEM) to Drupal 9, demonstrating proficiency in data migration, content restructuring, and system integration to ensure a smooth transition and improved website performance. Implemented the Content Moderation module in Drupal site, enhancing content management workflows by configuring customizable moderation states, transitions, and permissions to ensure streamlined content approval processes and improved editorial control.
Technologies: Drupal 9, css, js, twig, git
Industry: EdTech

• Better Health data

Project Description: Better Health Data is a sophisticated web-based framework for data collection, secure data storage and data analysis of participants who joined in it. It is a customized, interactive, web-based system that would support, manage and analyze data in a manner that was secure and would produce insightful and helpful reports and evidence for our program managers and parents of participants.
Responsibilities: Proficiently managed MySQL database operations. Developed custom code within the Drupal CMS and created bespoke themes to align with client requirements. Conducted thorough debugging processes to adapt to evolving client needs. Led the development, implementation, and support of database solutions. Successfully integrated Drupal with Moodle for enhanced functionality. Consumed REST APIs such as Mailchimp and ClickSend, integrating third-party services, due to this email and SMS notifications are automated using Drupal 7, enhancing communication efficiency. Utilized Views and Rules modules to enhance Drupal functionalities. Tested code and rectified website bugs on both client and server sides. Prepared detailed reports and correspondence pertaining to project specifications, activities, and progress.
Technologies: Drupal 7, PHP , MySQL
Industry: HealthTech

• Go4Fun

Project Description: Go4Fun is a FREE healthy lifestyle program for children who are above their healthy weight range. The program is fun, interactive and supports 7 to 13-year-old children and their families to adopt a healthy lifestyle and a long-lasting approach to healthy living.
Responsibilities: Created questionnaire forms for program managers and participants. Created an interface generation of reports of participants to program managers using JPGraph and Rich Text format (commonly known as rtf). Created questionnaire forms for participants. Created various menus in drupal site to access all functions. Drupal and moodle integration to watch videos from drupal. Generated Automated emails and sms using mailchimp API and clicksend API. Client-side jQuery validation for forms. Questionnaire theming and jQuery interface. Mobile responsiveness of website using bootstrap.
Technologies: Drupal 7, PHP , MySQL
Industry: Healthcare

EMPLOYMENT HISTORY

• Senior Drupal developer

Description: Working on a Decoupled Drupal website. Managed custom queue workers, optimizing asynchronous processing of tasks such as file uploads, API calls, and content migrations. Designed and developed custom entities to support business-specific content structures. Created and maintained custom queues to handle high-volume tasks efficiently, ensuring reliable and scalable background processing. Developed a robust workflow using Drupal’s Content Moderation module, streamlining the content approval process and ensuring compliance with editorial standards. Collaborated with front-end developers to ensure seamless integration between the Drupal back-end and decoupled front-end applications. Utilized best practices for Drupal development, including coding standards, security protocols, and performance optimization. Actively contributed to troubleshooting and resolving issues related to queue processing, content workflows, and data synchronization.

CERTIFICATION

• Acquia Drupal 10 site builder by Acquia 2024

EDUCATION

• Bachelors degree in B.tech from Gayatri vidhya parishad 2012 - 2016

LANGUAGES

• English - advanced
