• Drupal	5 years & 2 months
• Content modeling	5 years & 2 months
• Custom module development	4 years & 3 months
• Layout Builder	3 years & 3 months
• PHP	3 years & 4 months

SOFT SKILLS

Problem-solving, Time management

PROJECT DETAILS

• Prologis July-2019 - June-2025

Project Description: As a Sr. Full-stack Developer, Devesh worked on this project which involved content management, role creation, and leveraging Drupal 10. His responsibilities included working with Twig views templates, jQuery, custom modules, custom themes, and API integration. PHP is the fundamental language for all these Drupal components.

Responsibilities: Sr. Full stack Drupal developer: His role involves leveraging PHP for custom module development, custom theme development, and working with REST APIs within the Drupal framework. OOPS Concept: He applies Object-Oriented Programming (OOP) concepts, which are fundamental to advanced PHP development in Drupal.

Technologies: Content Management, Role creation, Drupal 10, Twig views templates, jQuery, Custom Module, Custom Theme, API Integration. (PHP is underlying for Drupal development).

Industry: Real Estate

• MTN mPulse June-2017 - August-2018

Project Description: Lead Developer, Devesh was responsible for content management, role creation, Drupal 10, Twig views templates, LESS CSS, jQuery, Layout Builder, and custom modules. PHP is the core language for implementing custom modules and backend logic. Allsides: As a Lead Developer for this Drupal 7 project, Devesh worked on Stripe payment gateway integration, Solr search, and custom modules. PHP was crucial for handling these integrations and custom functionalities.

Responsibilities: Custom Module Development: He is responsible for building custom Drupal modules, which are primarily written in PHP. Custom Theme Development: While theming involves Twig, the underlying logic and data processing for custom themes in Drupal often rely on PHP. His experience converting PSD/Figma designs to Drupal also implies a strong understanding of how front-end designs integrate with PHP-driven Drupal. Rest API: He has experience in implementing and working with REST APIs, which in Drupal are built using PHP. Content Management, User Role Management: These functionalities are managed and extended through PHP code in Drupal. Payment Gateway Integration: Specifically, he mentions Stripe integration, which would involve PHP for server-side processing of payment requests.

Technologies: Content Management, Role creation, Drupal 10, Twig views templates, jQuery, Custom Module, Custom Theme, API Integration, NPG Payment Gateway. (PHP is underlying for Drupal development).

Industry: Software and Platforms
