As an accomplished Technical Architect with a strong foundation in Drupal development, I bring over a decade of experience in designing and implementing scalable web applications. Currently, I am leveraging my expertise by leading architectural design and collaborating with cross-functional teams to deliver innovative solutions that meet project requirements and exceed client expectations. My journey in the tech industry has equipped me with a diverse skill set, including advanced proficiency in Drupal (versions 7 to 11), PHP, MySQL, and various web technologies. I have successfully managed complex projects, mentored junior developers, and conducted code reviews to uphold high coding standards. My commitment to continuous improvement and performance optimization has consistently resulted in enhanced system functionality and user satisfaction. I am passionate about integrating emerging technologies and best practices into my work, ensuring that the solutions I deliver are not only effective but also secure and maintainable. My experience spans various roles, from Technical Lead to Team Lead, where I have honed my project management skills and developed a strong understanding of Agile methodologies. In addition to my technical expertise, I actively engage with the Drupal community, contributing to open-source projects and staying updated with the latest trends. I hold multiple Acquia certifications, including being a Grand Master in Drupal 9 and 8, and I am a certified Scrum Master. I am always open to new opportunities and collaborations that challenge my skills and allow me to contribute to innovative projects.

INDUSTRIES: IT services, Education
