Communication, Time management, Teamwork, Problem-solving

PROJECT DETAILS

• Flamingo Eats App

Project Description: This online meal ordering platform enables users to subscribe to various plans for exclusive meal offers. The application also facilitates a complete service ecosystem by allowing the creation of both business and driver accounts.
Responsibilities: Developed features and optimized performance to deliver a highly responsive and seamless user experience.
Technologies: : PHP Laravel Framework, Stripe Payment Gateway, MySQL, jQuery, AJAX, HTML
Industry: Consumer Goods and Services

• One Degree App

Project Description: The One Degree App is a digital platform that connects volunteers with opportunities to support local communities. It empowers users to find, track, and share essential resources for needs such as housing and food, thereby fostering greater community engagement and social impact. The app's core aim is to simplify the process of helping others.
Responsibilities: Developed, tested, and maintained core app features, ensuring robust reliability and optimal performance.
Technologies: : Socket.io, PHP Laravel Framework, Stripe Payment Gateway, MySQL, HTML CSS, JavaScript, jQuery, Ajax
Industry: Consumer Goods and Services

• ETROG

Project Description: ETROG is an online platform designed for comprehensive patient monitoring. It enables users, nurses, doctors, and organizations to maintain real-time patient data sourced from connected IoT devices. The system automatically sends critical alerts to the organization, nurse, or physician if patients exhibit unstable vital values or if medications/measurements are not taken on schedule.

Responsibilities: Designed and developed robust backend systems, integrated essential APIs, and ensured stringent data security.

Technologies: PHP Laravel Framework, jQuery, Highcharts, Bootstrap, MySQL, REST API

Industry: Consumer Goods and Services

• Flip Trader

Project Description: This web platform is a comprehensive real estate solution that facilitates buying, selling, and securing loans on properties. Users can participate in property auctions or make direct purchases. The platform supports three distinct user roles: Buyers, Sellers, and Lenders, with Lenders providing property-backed loans. It also includes valuable tools like a Deal Analyzer and a Mortgage Calculator.

Responsibilities: Developed sophisticated trading algorithms, integrated various APIs, and ensured high system reliability.

Technologies: PHP Laravel Framework, AJAX, Html, CSS, JavaScript, jQuery

Industry: Consumer Goods and Services

• Wonning Markt

Project Description: Wonning Markt Project Description Wonning Markt is an online e-commerce platform that connects customers with local farmers and suppliers, offering a curated selection of fresh produce, pantry staples, and specialty items. The platform prioritizes quality, sustainability, and convenience, aiming to simplify the grocery shopping experience.

Responsibilities: Developed and maintained core marketplace features, optimized performance, and ensured robust security.

Technologies: Node, Laravel, Angular, Microservices

Industry: Consumer Goods and Services

• Hungry Hochatown

Project Description: This platform serves as a universal solution for restaurants, enabling them to effortlessly establish online food ordering systems tailored to their unique offerings. The intuitive system allows restaurants to easily categorize menu items, incorporate customizable add-ons to enhance customer choices, and make swift modifications to adapt to changing preferences, trends, or seasonal variations. This ensures a dynamic and appealing menu for customers.

Responsibilities: Developed and maintained app features, optimized performance, and actively worked to ensure high user satisfaction.

Technologies: Nodejs, PHP (Laravel Framework), MySQL, ReactJS

Industry: Consumer Goods and Services
