Experienced Web Designer with a demonstrated history of working in the information technology and services industry. Design has been my hobby and luckily over time it has become my profession which I really enjoy. I design with simplicity, usability and beauty in mind. This is something serious for me.When I design UI for websites and mobile, I pretend as if I am just making another masterpiece & its the only reason that motivated me to become a talented Web & UI designer. I am a perfectionist, so I can assure you that every single detail will be polished and the final product will shine bright like a diamond. My goal is to provide you with an outstanding design, so you can be distinguished and always one step ahead of your competitors. Skills: HTML5, CSS3, Bootstrap, Saas, less, Angular Js, web design, logo design, branding and identity, typography, UI design, packaging, InDesign, Photoshop, Adobe Illustrator.

INDUSTRIES: Education, Ecommerce, Sports, Manufacturing

• WordPress Developer

Project Description: Baylor Crew is the collegiate rowing team of Baylor University, operating as a co-ed club that competes in regattas against colleges nationwide. The team's website serves as the central hub for information, providing insights into their mission, upcoming events, membership opportunities, and avenues for community support.

Responsibilities: Designing and implementing responsive, user-friendly websites to enhance user engagement and satisfaction. Developing custom WordPress themes and plugins to extend site functionality and meet specific project requirements. Ensuring consistent design and functionality by creating reusable, modular components within the WordPress framework. Managing website back-end tasks, including database and server integration, to ensure seamless data flow and performance. Optimizing website performance to achieve fast load times and a smooth user experience across various devices and browsers. Writing clean, maintainable code and conducting thorough testing to ensure the reliability and stability of the website. Collaborating with back-end developers and designers to integrate UI components with server-side logic, ensuring cohesive application development. Staying updated with the latest industry trends and technologies to incorporate best practices into WordPress development.

Project Description: Machining & Welding (M&W) is a U.S.-based manufacturer specializing in innovative lifting products and plate clamps. Their offerings include lifting beams, spreader beams, lifting hooks, forklift attachments, material baskets, heavy-duty material stands, concrete barrier lifts, gas cylinder lifters, lifting tongs, pallet lifters, and coil lifters. All products are made in the USA and are known for their strength, dependability, and rigorous testing to ensure safety and reliability.

Responsibilities: Designing and implementing responsive, user-friendly websites to enhance user engagement and satisfaction. Developing reusable, modular WordPress themes and plugins to maintain consistency and improve development efficiency. Utilizing state management techniques to effectively manage application state, ensuring data consistency across the platform. Integrating RESTful APIs and GraphQL to facilitate seamless data exchange between the front-end and back-end systems. Optimizing website performance to ensure fast load times and a smooth user experience across various devices and browsers. Writing clean, maintainable code and conducting thorough testing to ensure the reliability and stability of the website. Collaborating closely with designers, back-end developers, and stakeholders to translate business requirements into technical solutions and ensure cohesive website development. Staying updated with the latest industry trends and technologies to incorporate best practices and maintain the website's competitiveness.
