My Strengths are: . Team Management Skills. Leading a team with positive attitude. I believe in simple living and can work under pressurized conditions. Of course I am a fast learner, hard worker and dedicated. Excellent Communication Skills.

INDUSTRIES: Digital Media and Content Creation, AI Awareness, Marketplace, Finance

TECHNICAL SKILLS

• WordPress	8 years & 3 months
• HTML & CSS	8 years
• Shopify	6 years & 2 months
• Laravel	5 years & 5 months
• Codignator	5 years
• React.Js	4 years & 4 months

PROJECT DETAILS

• Mulesoft

Project Description: The MuleSoft Blogs Website serves as an official content hub where MuleSoft shares industry insights, technical guides, and best practices related to API-led connectivity, integration, and digital transformation.

Responsibilities: Write clean, efficient PHP code using frameworks like Laravel, CodeIgniter, or Symfony. Design, optimize, and manage databases (MySQL, PostgreSQL). Create RESTful APIs and integrate third-party services. Work with HTML, CSS, JavaScript (React/Vue.js) for seamless UI integration. Identify and resolve bugs, optimize performance. Apply best practices for authentication, encryption, and data protection. Use Git/GitHub for source code management. Perform unit testing, CI/CD integration, and server deployment. Improve application speed, caching (Redis, Memcached), and database efficiency. Maintain technical documentation and work with cross-functional teams.

Technologies: Laravel, Reactjs

Industry: Digital Media and Content Creation

• Mind-Alliance

Project Description: Mind-Alliance is an AI-driven platform designed to enhance collaborative decision-making, knowledge management, and strategic intelligence. It helps organizations in industries like legal, defense, and corporate strategy streamline communication, automate workflows, and gain data-driven insights. The platform enables teams to improve situational awareness and make well-informed decisions efficiently. As a PHP Developer, the project involves building and maintaining a robust, scalable web application with a secure backend, seamless API integrations, and optimized database management to ensure high performance and reliability.

Responsibilities: Build scalable, secure, and high-performance applications using PHP (Laravel, Symfony, or CodeIgniter). Design, optimize, and maintain MySQL/PostgreSQL databases. Create and integrate RESTful/GraphQL APIs for seamless data exchange. Work with HTML, CSS, JavaScript (React/Vue.js) to integrate UI with backend. Improve website speed, caching (Redis, Memcached), and database queries. Ensure authentication, encryption, and data protection (OAuth, JWT, CSRF). Use Git for source control and CI/CD pipelines for automated deployments. Perform unit testing, bug fixing, and code refactoring for efficiency. Deploy and manage applications on AWS, DigitalOcean, or Google Cloud. Maintain clear documentation for APIs, workflows, and development processes.

Technologies: Laravel

Industry: AI Awareness

• NBC Universal

Project Description: NBCUniversal Together Insights is a data-driven platform that provides industry research, audience analytics, and market trends to help advertisers make informed decisions and optimize marketing strategies.

Responsibilities: Develop and maintain backend using PHP frameworks (Laravel/Symfony). Design and optimize database queries for high-performance data retrieval. Implement RESTful APIs for seamless data exchange. Ensure website security, authentication, and data protection. Work with frontend developers to integrate UI with backend logic. Optimize performance using caching (Redis) and load balancing. Deploy and manage applications on cloud platforms (AWS, GCP).

Technologies: Codiginator

Industry: Marketplace

• One Life

Project Description: The One Life Financial Group website serves as the primary digital platform for the firm, providing information about their services, processes, and team. It offers resources such as eBooks and facilitates client engagement through consultation scheduling and assessments. The website aims to deliver a user-friendly experience, ensuring that clients and prospects can easily access the information they need to make informed financial decisions.

Responsibilities: Design and implement responsive and intuitive user interfaces using React.js to enhance user engagement. Build reusable and modular React components to maintain consistency and improve development efficiency. Manage the application's state effectively using Redux to ensure data consistency across the application. Integrate RESTful APIs using Axios to fetch and display dynamic content, ensuring seamless communication between the front-end and back-end services. Implement client-side routing with React Router to enable smooth navigation and a single-page application experience. Optimize components and overall application performance to ensure fast load times and a smooth user experience across various devices and browsers. Write clean, maintainable code and conduct thorough testing to ensure the reliability and stability of the application. Work closely with designers, back-end developers, and stakeholders to translate business requirements into technical solutions and ensure cohesive application development. Stay updated with the latest industry trends and technologies to incorporate best practices and maintain the application's competitiveness.

Technologies: Reactjs

Industry: Finance
