Results-driven and hands-on Senior PHP Architect with 10+ years of experience in enterprise PHP development and architectural leadership. Expert in designing scalable, modular web architectures using Laravel, CodeIgniter, and MySQL, and modernizing legacy systems for high availability and performance. Adept in leading cross-functional teams, enforcing best coding practices, and aligning technical strategy with business objectives. Proven ability in cloud deployment (AWS), microservices, and full-stack integration with JavaScript technologies. Passionate about mentoring teams and fostering scalable, secure, and maintainable codebases.

INDUSTRIES: EdTech, IT services

TECHNICAL SKILLS

• Languages PHP JavaScript CSS Python SQL	10 years & 4 months
• Tools Git REST APIs PHPUnit GitHub Postman	9 years & 6 months
• Laravel CodeIgniter Bootstrap jQuery	8 years & 7 months
• Databases MySQL Tuning Indexing ER Diagrams	8 years & 7 months
• Cloud AWS EC2 S3 RDS Route 53	5 years & 7 months

SOFT SKILLS

Other: Wordpress, React Basics, Prompt Engineering (OpenAI, Gemini)

PROJECT DETAILS

• Dijit Program

Project Description: Project Description: Developed and maintained a scalable Learning Management System (LMS) integrated with CRM features for managing courses, students, and communications. Built custom modules for user registration, progress tracking, quizzes, and certificate generation. Implemented role-based access control (admin, trainer, student) to secure platform functionality. Integrated AWS services for hosting, storage, and improved system performance and reliability. Designed optimized MySQL database architecture to handle high user load and large datasets efficiently. Enhanced UX/UI with responsive design and real-time notifications using Laravel Echo and Pusher.

Responsibilities: Responsibilities: Designed and developed core LMS functionalities including course creation, user progress tracking, and certification modules. Built CRM features for managing leads, student communications, and follow-ups. Created secure, role-based access for admins, educators, and students. Integrated AWS services (S3, EC2) for cloud storage, scalability, and performance optimization. Structured and optimized MySQL database for fast queries and efficient data handling. Implemented RESTful APIs for front-end integration and third-party services. Conducted regular code reviews and performance audits to maintain code quality.

Technologies: EdTech LMS & CRM | Laravel, MySQL, AWS

Industry: EdTech

• Brand 365

Project Description: Project Description : Built a poster-making and automation platform for small businesses to create branded content easily. Developed dynamic templates and image editing tools using Laravel and third-party APIs. Automated marketing tasks such as daily greetings, festival posters, and promotional material generation. Implemented user authentication, subscription management, and analytics dashboard. Optimized back-end performance for handling large image files and simultaneous editing sessions. Contributed to improving user retention through streamlined workflows and intuitive UI design.

Responsibilities: Responsibilities: Developed customizable poster templates with real-time content rendering using Laravel and image manipulation libraries. Built user-friendly interfaces for template selection, text/image editing, and content preview. Integrated automation features for scheduling and delivering posters based on events and festivals. Managed user authentication, subscriptions, and feature-based access control. Created dashboards for user activity tracking and content analytics. Ensured mobile responsiveness and performance optimization for high-traffic usage. Collaborated with UI/UX designers to ensure smooth and intuitive user journeys.

Technologies: Poster maker & business automation | Laravel

Industry: IT services

EMPLOYMENT HISTORY

• Senior PHP Developer

Description: - Led the architecture design and modernization of DijitProgram's EdTech platform using Laravel and modular coding standards. - Mentored 6+ developers on code quality, testing practices, and architectural decisions. - Deployed scalable features on AWS using EC2, RDS, and load balancing. - Ensured compliance with security standards, built multi-role access control layers.

CERTIFICATION

• Vishal Saroch by 2015

EDUCATION

• Bachelors degree in Computer Science from HPU 2012 - 2015

LANGUAGES

• English - native
