Experienced Full Stack Developer with a proven track record of 6 years specializing in scalable web applications using React.js, Node.js, and TypeScript. Proficient in modern UI development, backend architecture, RESTful APIs, and secure authentication systems. Skilled in Agile methodologies and adept at working in fast-paced product teams. Demonstrated expertise in CI/CD processes. Known for delivering high-quality, performance-driven solutions.

INDUSTRIES: Software and Platforms, Education

TECHNICAL SKILLS

• React js	6 years
• Nextjs	5 years
• Node.js	5 years
• TypeScript	5 years
• MongoDB	5 years

PROJECT DETAILS

• Remote Access Integration Platform — November-2023 - March-2025

Project Description: Built a secure, real-time remote monitoring system for enterprise-level access management. Integrated LogMeIn APIs to track, record, and manage user remote session activities across devices.

Responsibilities: Designed and developed user dashboards to display live remote session logs and device statuses. Integrated LogMeIn authentication and API access for session data. Developed Node.js services with proper route level security and rate limiting. Implemented modular components using Atomic Design principles and Tailwind CSS for fast, responsive UI. Reduced page load times by 30% with lazy loading and API optimization.

Technologies: React.js, TypeScript, Node.js, Express.js, Next.js, MongoDB, Tailwind CSS, Docker

Industry: Software and Platforms

• E-Learning Dashboard

Project Description: Developed an education platform enabling course creation, student tracking, and assessment management for universities and training centers.

Responsibilities: Built reusable form builders for quizzes, assignments, and test modules. Implemented role-based dashboards (Admin, Teacher, Student) with dynamic routing and session management. Used Redux for global state management and real-time feedback flows. Collaborated on Node.js-based backend for quiz evaluations and course analytics. Wrote unit/integration tests using Jest to maintain 90%+ test coverage.

Technologies: React.js, Next.js, TypeScript, Redux, Material UI, Node.js, PostgreSQL

Industry: Education

EMPLOYMENT HISTORY

• Senior Software Developer March-2022 - June-2025

Description: Developed and maintained end-to-end full stack applications using React.js, TypeScript, Node.js, and PostgreSQL. Translated complex Figma designs into pixel-perfect, responsive UIs using Tailwind CSS and Material UI. Created scalable REST APIs, implemented JWT-based authentication and integrated Redis for caching. Led agile ceremonies, mentored junior developers, and improved code quality through unit testing and code reviews. Contributed to CI/CD workflows and Dockerized services for efficient deployment.

• Software Developer April-2018 - February-2022

Dev Ripples Infotech Pvt ltd

Description: Worked on building user-centric dashboards and admin panels using React and Redux. Developed Node.js APIs with Express and MongoDB for data driven web apps. Focused on code maintainability, testing, and debugging across frontend and backend systems. Built reusable front-end components and integrated backend services in a modular monolith architecture. Participated in sprint planning, client demos, and cross-functional team collaborations.

EDUCATION

• Bachelors degree in B.Tech from University of Rajasthan 2014 - 2018

LANGUAGES

• English - advanced
