I have 5+ years of experience in Software Development. Having Knowledge in React JS, Redux, Node JS, Express JS, NextJs, MongoDB, JavaScript & Typescript, HTML, CSS, GIT. Experience in microservices and API development using Node.js. Strong database management skills (PostgreSQL, MySQL, MongoDB) Having experience in AWS services (EC2, S3, Lambda) Enforcing code quality, conducting reviews, and implementing best practices Leading teams with Agile methodologies (Scrum, sprint planning, stand-ups) Knowing OAuth2, JWT, OpenID Connect, and secure authentication methods. Having experience with AWS for Deployment and knowledge is Next JS. Having experience in gathering requirements from clients and completing projects in time. Strong conceptual and design skills, and have been involved in software and website development, and developing and monitoring standards of user interfaces. Hard worker, Quick learner and always ready for challenges.

INDUSTRIES: Software and Platforms

TECHNICAL SKILLS

• React js	5 years & 3 months
• HTML5	5 years & 3 months
• JavaScript	5 years & 3 months
• CSS3	5 years & 3 months
• Next.js	3 years & 3 months
• Node.js	3 years & 3 months

PROJECT DETAILS

• Learning Management System

Project Description: This is an LMS platform where users can check all available security related courses and take the assessment based on their subscription. In the assessment, users can see the topology of the network and start stop any instance dockers. Also, admins can manage users & courses from this system.
Responsibilities: Developed and maintained backend services using Nestjs, MySQL, and TypeScript for seamless course and assessment management. Implemented interactive assessment features, enabling users to visualize network topology and control instances docker environments. Designed and developed admin functionalities for efficient user and course management within the LMS platform.
Technologies: React JS, Redux, Typescript, NextJS, MongoDB, Material UI, AWS
Industry: Software and Platforms

• Lead Distribution Platform

Project Description: This is a lead distribution platform that sells motivated seller leads to real estate investors nationwide. End users will be able to log in, add territories, schedule set up calls, and set up notifications via SMS, email, and webhooks.
Responsibilities: Developed and maintained scalable front end components using React and TypeScript for a seamless user experience. Implemented backend services with Node.js and AWS to manage lead distribution, territory management, and notifications. Collaborated with the team to integrate SMS, email, and webhook notifications, ensuring real time updates for users.
Technologies: ReactJS, Javascript, MySQL, Jest, AWS
Industry: Software and Platforms

• Crypto Loans

Project Description: This platform allows users to connect multiple crypto wallet accounts like Xverse, UniSat, and Plug. Once a user connects the wallet, his or her assets will be fetched and displayed. Users can lend or borrow assets and make transactions through this app.
Responsibilities: Developed and integrated secure wallet connection features for Xverse, UniSat, and Plug using React, NodeJS, and TypeScript. Enabled seamless lending, borrowing, and transaction functionalities while ensuring security and performance optimization. Designed and implemented backend APIs for fetching, displaying, and managing user crypto assets with MongoDB.
Technologies: Angular, Javascript, MongoDB, NodeJS, AWS
Industry: Software and Platforms

EDUCATION

• Bachelors degree in CS from Tagore Institute Of Engineering And Technology 2015 - 2019

LANGUAGES

• English - advanced
