A Ruby on Rails developer with over 7 years of experience in building scalable and high-performing web applications. Experienced in working with product-based organizations like SellerChamp, BioMark, Springbig, and IPwe, with expertise in both backend and frontend development. Skilled in Ruby on Rails, JavaScript, PostgreSQL, Redis, AWS, and Elasticsearch, with a strong focus on designing efficient systems, integrating third-party APIs, and delivering end-to-end solutions. Passionate about clean code, problem-solving, and creating applications that deliver real business value.

INDUSTRIES: Ecommerce, Healthcare

TECHNICAL SKILLS

• Ruby	7 years & 11 months
• ROR	7 years & 11 months
• JavaScript	7 years & 11 months
• Git	7 years & 11 months
• AWS	5 years

SOFT SKILLS

Communication, Teamwork, Problem-solving

PROJECT DETAILS

• SellerChamp September-2017 - October-2021

Project Description: SellerChamp is an e-commerce automation platform designed to simplify product listing, inventory management, and order fulfilment across multiple marketplaces.
Responsibilities: Fixed bugs, added new features, and redesigned parts of the application Integrated new HTML and improved UI Wrote RSpec tests to ensure code reliability
Technologies: Ruby on Rails
Industry: Ecommerce
Link: https://sellerchamp.com/

• BioMark November-2021 - July-2025

Project Description: BioMark is a healthcare application focused on tracking and analyzing patient health data through an interactive and user-friendly platform.
Responsibilities: Developed new features and fixed bugs using Ruby on Rails, MySQL, JavaScript, and Bootstrap. Converted design mockups into functional interfaces with HTML, CSS, JavaScript, and AJAX. Improved performance by implementing Redis and Sidekiq for background processing. Wrote test cases with RSpec to ensure reliability and maintainability of the application.
Technologies: Ruby on Rails
Industry: Healthcare

EMPLOYMENT HISTORY

• Ruby on rails developer September-2017 - October-2021

Description: I have over 7 years of experience as a Ruby on Rails developer, working across the full software development lifecycle from requirement gathering to deployment and production support. My responsibilities have included designing and developing scalable backend systems, building responsive and user-friendly front-end interfaces, and integrating third-party APIs and payment gateways. I have optimized application performance and scalability using tools such as Redis, Sidekiq, and Elasticsearch, and ensured reliability through automated testing with RSpec, Capybara, and Selenium. I have also managed deployments on platforms like AWS, Heroku, and Digital Ocean, while mentoring junior developers, conducting code reviews, and promoting best practices to maintain clean, reusable, and efficient code.

EDUCATION

• Bachelors degree in Computer Science from RGPV 2013 - 2017

LANGUAGES

• English - advanced
