+91 9820045154 | hr@augmntx.com

Experienced Backend Engineer with 4+ years of expertise in Ruby on Rails, REST API development, and database optimization. Skilled in designing scalable systems, integrating third-party APIs, and improving application performance for enterprise-grade solutions. Strong background in warehouse management systems, SaaS platforms, and property management solutions. Passionate about solving complex problems, delivering high-quality code, and contributing to high-performing engineering teams

INDUSTRIES: Information Technology Real Estate Property Management, Ecommerce

TECHNICAL SKILLS

• Ruby on Rails	4 years & 2 months
• HTML & CSS	4 years & 2 months
• JavaScript	4 years
• Ruby On Rails with TDD and BDD	4 years
• Boostrap	2 years

PROJECT DETAILS

• spaceOs July-2021 - July-2024

Project Description: spaceOs is a platform designed to streamline workspace and property management. It provides solutions for managing office spaces, tenants, bookings, payments, and community engagement. The system enhances tenant experience by offering real-time access to services, digital interactions, and efficient facility management tools.
Responsibilities: Developed and maintained backend features using Ruby on Rails, optimized database queries for performance, and integrated external APIs for payments and notifications. Worked on bug fixes, enhancements, and automation of recurring tasks. Collaborated with the team on architecture improvements, testing, and deployment processes to ensure scalability and system reliability.
Technologies: Ruby on Rails, PostgreSQL, Redis, Sidekiq, REST APIs, JavaScript
Industry: Information Technology Real Estate Property Management

• WMS

Project Description: A Warehouse Management System (WMS) designed to handle operations for large warehouses. The system manages inbound and outbound processes, order fulfillment, inventory tracking, put-away, stock adjustments, and reporting. It ensures real-time visibility, improves operational efficiency, and reduces errors by automating core warehouse workflows.
Responsibilities: Responsible for designing and implementing new backend features, optimizing database queries for high performance, integrating third-party APIs, and fixing bugs to ensure system stability. Worked on reporting modules, progress tracking, and improving overall efficiency of warehouse processes. Also contributed to code reviews, debugging, and enhancing scalability of the platform.
Technologies: Ruby on Rails, PostgreSQL, Redis, Sidekiq, REST APIs, JavaScript
Industry: Ecommerce

EMPLOYMENT HISTORY

• Software Engineer August-2024 - August-2025

Description: backend development , optimization

EDUCATION

• Masters degree in Computer Application from DAVV 2015 - 2021

LANGUAGES

• English - advanced
