• IMS DB	7 years & 8 months
• IMS DC	7 years & 8 months
• MQ	4 years & 2 months

PROJECT DETAILS

• Voya Agency Management System October-2016 - February-2021

Project Description: AEGON developed its protection business policy administration capability by leveraging the Guardian protection business capability. This AEGON policy administration system reused existing integration to surrounding service systems such as Agency and Commission. This means that AEGON and Guardian systems are not cleanly separated as they exist today During the TSA all assets will remain on AEGON infrastructure and will continue to be supported until the purchaser completes a migration to their own estate This means that some components, such as xPression, will continue to operate on a shared service basis and will be subject to further segregation work at the time of the purchasers migration off EDC

Responsibilities: This application involved Development, maintenance and enhancement activities. I am Involved in following activities: Involved in requirement gathering from clients, conducting functional & technical analysis and preparing HLD and LLD (specification) document as per new business requirements. Responsible for understanding new requirements and analyzing the existing code to identify required changes. Developing, Renovating and reviewing the code based on client request. Preparing test plans/ and SIT plans and carrying out the testing for the development activities. Conducting impact analysis of the changes, coordinating with other teams and providing necessary information. Preparing test plans & SIT plans, testing the development activities, and providing solutions to the tickets raised by the user during UAT. Involved in Project planning, Team handling, Task breakdown, and task and role assignment, Scope identification, Effort estimation, Requirement and Functional Analysis

Technologies: COBOL, JCL, VSAM, DB2, CICS, Easytrieve, IMS DB/DC, File-Aid and Expeditor.

Industry: Insurance
