I am a skilled Power BI Developer with hands-on experience in designing and developing interactive dashboards, reports, and data models that provide meaningful business insights. My expertise includes transforming raw data from multiple sources into well-structured models, creating DAX measures for advanced analytics, and building visually impactful reports tailored to stakeholder needs. I am proficient in end-to-end BI development, from requirement gathering and data integration to publishing and optimizing reports within Power BI Service. With strong problem-solving skills and a focus on accuracy, performance, and user experience, I strive to deliver data-driven solutions that support informed decision-making and business growth.

INDUSTRIES: Data Analytics

TECHNICAL SKILLS

• POWER BI	7 years & 4 months
• Data Visualization	7 years & 4 months
• DAX	7 years & 4 months
• Excel VBA	7 years & 4 months
• SQL	4 years

PROJECT DETAILS

• Next Gen dashboard

Project Description: Implemented Power BI dashboards and reports that provided actionable insights, leading to more informed decision-making processes across the organization. Identified inefficiencies or areas of improvement through data analysis, resulting in costsaving measures or optimizations in business operations. Designed Power BI solutions that were scalable and adaptable to evolving business needs, allowing for seamless integration of new data sources or expansion into new markets.
Responsibilities: Play a key role in defining best practices for data modeling, DAX calculations, and visualization standards, while also establishing governance frameworks for data security and access control. Additionally, a Power BI Lead collaborates closely with stakeholders to deliver insights that drive decision-making, mentors team members to enhance their technical and analytical skills, and ensures alignment of BI solutions with organizational goals and enterprise data strategies.
Technologies: Power BI, Sql, Azure Devops
Industry: Data Analytics

• Customer Hero

Project Description: Collaborate with business stakeholders, data analysts, and IT teams to gather requirements, understand business objectives, and translate them into actionable BI solutions. Conduct regular meetings and presentations to solicit feedback and ensure alignment with stakeholder needs. Identify and troubleshoot issues related to data quality, data integration, or report performance within Power BI.
Responsibilities: Responsible for overseeing the end-to-end development, implementation, and governance of business intelligence solutions using Power BI. They lead a team of BI developers, ensuring that dashboards, reports, and data models are designed with accuracy, scalability, and performance in mind. Their responsibilities include gathering and analyzing business requirements, translating them into effective BI solutions, and ensuring data integrity across sources.
Technologies: Power BI, Synapse, SQL, Devops
Industry: Data Analytics

EDUCATION

• Bachelors degree in BSc from Kakathiya University 2014 - 2017

LANGUAGES

• English - intermediate
