With more than 5 years in the realm of React Native development, my focus has been on cross-platform technologies. My skill set is centred on building mobile applications using React Native platform development. I have a knack for brainstorming, evaluating, and maintaining Hybrid apps to ensure top-notch performance and user contentment. Additionally, I have successfully incorporated a variety of features, optimized app efficiency, and tackled technical challenges along the development journey. Harnessing strong project management skills, I streamline coordination efforts, ensuring the successful delivery of iOS and Android app projects.

INDUSTRIES: FinTech, Medical

TECHNICAL SKILLS

• JavaScript	5 years
• TypeScript	5 years
• React Native	5 years
• Jira	5 years
• Trello	5 years
• Asana	5 years
• Github	5 years
• Git	5 years
• Gitlab	5 years
• Bitbucket	5 years
• Detox	5 years
• Firebase	5 years
• Firestore	5 years
• Xcode IDE	5 years
• Android Studio IDE	5 years
• VS Code	5 years

PROJECT DETAILS

- SBPay

Project Description: Safety starts with understanding how developers collect and share your data. Data privacy and security practices may vary based on your use, region and age. The developer provided this information and may update it over time.
Responsibilities: In the SBPay project, I was responsible for the complete development and maintenance of the mobile application. SBPay is a lightweight client version of the main web platform, designed to track and collect transaction details from specific platforms through native SMS reading. As the app is built exclusively for Android, I developed custom Native Modules to implement the SMS listener functionality. To enhance efficiency and accuracy, I leveraged AI-based logic within the Native Modules codebase to intelligently filter and extract relevant transaction information from SMS messages. This data is then securely transmitted to the server. The app is optimized for performance and reliability when handling sensitive financial data.
Technologies: React Native with Native Modules
Industry: FinTech

• Mamahood

Project Description: Start your journey from planning to parenthood with Mamahood the ultimate pregnancy app that's with you every step of the way. Navigate your way from understanding your menstrual and ovulation cycles to nurturing your newborn with Mamahood, the comprehensive Pregnancy App that supports you through fertility, pregnancy, and parenthood. Whether you're planning your first baby or caring for a little one, Mamahood keeps you connected, informed, and empowered every step of the way.

Responsibilities: In the Mamahood project, I am responsible for developing and maintaining app functionalities. I have developed a chat module using the get-stream chat SDK and managed in-app subscriptions through the Play Store and the App Store. Additionally, I oversee the management of localizations with RTL support. The app is available in English, Hindi, and Arabic languages.

Technologies: React Native, TypeScript, Redux, Get-stream

Industry: Medical

EMPLOYMENT HISTORY

• React Native Developer

Description: With more than 5 years in the realm of React Native development, my focus has been on cross-platform technologies. My skill set is centred on building mobile applications using React Native platform development. I have a knack for brainstorming, evaluating, and maintaining Hybrid apps to ensure top-notch performance and user contentment. Additionally, I have successfully incorporated a variety of features, optimized app efficiency, and tackled technical challenges along the development journey. Harnessing strong project management skills, I streamline coordination efforts, ensuring the successful delivery of iOS and Android app projects.

EDUCATION

• Bachelors degree in Computer Scince from Gujarat Technological University 2017 - 2019

LANGUAGES

• English - advanced
