I am a skilled MEAN stack developer with 4+ years of experience building scalable web applications and APIs. Proficient in Angular, Node.js, Express.js, and MongoDB, I specialize in delivering end-to-end solutions with clean architecture and optimized performance. My expertise includes API integration, Firebase Authentication, CI/CD pipelines, Docker/Kubernetes deployment, and database optimization with Mongoose. I enjoy collaborating with teams, reviewing code for quality, and mentoring developers, while also thriving in independent problem-solving. With a strong track record of deploying applications on AWS, Heroku, and DigitalOcean, I focus on creating reliable, user-friendly, and future-ready applications.

INDUSTRIES: Survey Management system, Administrative tool, Device commerce

TECHNICAL SKILLS

• NodeJS	4 years & 6 months
• Express.js	4 years & 6 months
• API Gateway	3 years & 4 months
• Swagger	2 years & 4 months
• Jest	2 years & 2 months
• AWS	2 years & 4 months
• Docker	2 years & 3 months
• OpenAPI	1 years & 10 months
• CI CD Pipeline	1 years & 3 months
• Kubernetes	1 years & 3 months

SOFT SKILLS

Communication, Teamwork, Problem-solving, Time management, Critical thinking

PROJECT DETAILS

- InnovateMR

Project Description: Innovate MR is a Survey Management system that offers various functionalities in its Admin dashboard, including managing jobs and surveys for customers, suppliers, and the survey flow from end to end. The system also records survey transactions, calculates costs, and generates reports. It integrates with third-party marketplaces and Hubspot and includes a bidding module and an account and invoicing module. The application is built module-wise, resulting in increased business and quicker project completion for clients.
Responsibilities: Contributed to the development of major application modules, including Manage Customers, Manage Suppliers, and Manage Surveys Implemented a system to record survey transactions, calculate costs and profits, and generate reports Developed an interface for seamless communication and data exchange between the application and external service providers Wrote clean, maintainable, and testable code in accordance with industry best practices and coding standards Implemented security measures to protect the application from potential threats and vulnerabilities Integrated efficient data storage solutions such as MongoDB and Redis to enhance data management and retrieval Role: MEAN Developer Team Size: 11
Technologies: Node.js Docker Mysql Redis Angular Express js MongoDB
Industry: Survey Management system
Link: https://www.innovatemr.com

• Datadiggers Admin

Project Description: The application is designed as an administrative tool with survey-based modules that allow for efficient management of clients, employees, access control, quotations, and survey questions. Its comprehensive set of functionalities ensures seamless management of these components, resulting in improved productivity and streamlined operations.
Responsibilities: Successfully migrated an Angular 6 application to Angular 14 while ensuring seamless functionality and a smooth user experience Integrated various third-party APIs, including Lucid API integration, to enhance the application's features and capabilities Deployed the application on both Heroku (staging) and Amazon (production) servers, ensuring maximum uptime and scalability Implemented MongoDB as a data storage solution, optimizing data management and retrieval for enhanced performance Effectively managed numerous JIRA tickets, implementing both front-end and back-end functionalities to meet project requirements Created and managed user accounts, set up log management, and maintained EBS volumes and EIP to EC2 instances, ensuring secure and reliable application operations Developed comprehensive project documentation, including the requirement gathering phase, planning, and execution, to facilitate efficient project management and future maintenance Role: MEAN Developer Team Size: 2
Technologies: Angular 6 CI/ CD pipeline Nodejs Express MongoDB
Industry: Administrative tool

• EdeeCircle

Project Description: EdeeCircle is the leading device commerce and recycling platform company that enables customers/businesses to buy and sell pre-owned consumer electronics. It provides customers with simple selling options by listing their used electronic devices for sale or purchasing EdeeCircle-certified devices.
Responsibilities: Develop and execute unit, functional, and integration testing of developed software components Integrated Social platform login Used Google APIs for communication with Google Services and their integration into other services Integrated Firebase Authentication to enable secure user authentication using email/password, social login providers (e.g., Google, Facebook), and phone authentication. Implemented push notifications using Firebase Cloud Messaging (FCM) to engage users with personalized promotions, order updates, and important announcements Configured Firebase Analytics to track user interactions, product views, conversion rates, and other key metrics to analyze user behavior and optimize the e-commerce platform. API's documentation using swagger
Technologies: Angular Nodejs ExpressJS MongoDB Firebase AWS Lambda AWS EC2 AWS S3 AWS code pipeline
Industry: Device commerce

EMPLOYMENT HISTORY

• MEAN developer

Description: Skilled MEAN stack developer with experience in Angular (v11–14), Node.js, Express.js, and MongoDB, along with strong expertise in HTML5, CSS3, Bootstrap, and JavaScript. Proficient in full-stack application development, API integration, and Firebase Authentication. Experienced in writing test cases with Protractor and Cypress.io, performing CRUD operations and database optimization in MongoDB, and deploying applications on AWS, Heroku, and DigitalOcean with Docker/Kubernetes support. Adept in CI/CD pipelines, Git version control, and code reviews, with proven ability to optimize applications, collaborate across teams, and mentor developers.

EDUCATION

• Bachelors degree in Computer Science from Rajasthan Technical University 2018 - 2021

LANGUAGES

• English - advanced
