PROJECT DETAILS

• Stackur

Project Description: Stackur is a web-based business management platform that enables organizations to streamline operations through a robust admin portal and secure REST APIs. It supports efficient data management, process automation, and scalability, catering to business needs across multiple domains.
Responsibilities: Designed, developed, and deployed the admin portal and REST APIs using Lucee and ColdBox. Collaborated with business stakeholders to gather requirements and provide accurate timeline estimations. Participated in Scrum ceremonies, including sprint planning, backlog refinement, and daily stand-ups. Worked closely with team members and the lead to ensure adherence to best coding practices and timely delivery.
Technologies: Lucee, ColdBox, MySQL, Bootstrap, CSS, JavaScript, jQuery
Industry: Technology

• Svetness

Project Description: Svetness is a personal training application that connects fitness trainers with clients, offering features such as scheduling, session tracking, and profile management. The platform simplifies the management of fitness services while ensuring responsive design and secure user interactions.
Responsibilities: Worked as a Full Stack Developer, implementing both frontend and backend functionalities. Developed core features using ColdFusion and integrated responsive UI with Bootstrap, CSS, and JavaScript. Directly interacted with business teams to gather requirements, analyze workflows, and provide delivery estimates. Delivered modules within a small team setup, ensuring high-quality code and adherence to timelines.
Technologies: ColdFusion, MySQL, Bootstrap, CSS, JavaScript, jQuery
Industry: Health care

• Claim Compensation Application

Project Description: In UK there are 17 private companies who operate the train services and TTCS have developed a solution to create a claim if train gets delays or cancelled. There is a customer portal where a user can enter their details like personal details, train details, ticket details and then make a request for claim.
Responsibilities: Worked as senior developer in a team of 8 developers and one team lead and one Manager. Developed Services, logics in ColdFusion. Responsible for gathering requirements from business and estimate the timelines. Actively involved Scrum planning and daily scrum meetings.
Technologies: ColdFusion (Fusebox), MySQL, Bootstrap, CSS, JS, jQuery
Industry: Travel

• Delay Repay Genie (DRG)

Project Description: Delay repay genie is UK based web application; the main target of this application is to provide the auto claim submission facilities and account management for the user/traveler of the train. Also add/update personal details, add/update ticket details, add/update routes, search possible and existing claim, view possible and existing claims, submit auto claim for compensation, and find train details etc.
Responsibilities: Worked as a Team leader as well as individual contributor in a team of 5 developers. Developed the base of project with MVC structure. Involved in writing code using Controller logic and front-end design as well. Responsible for gathering requirements from business and estimate the timelines. Actively involved Scrum planning and daily scrum meetings.
Technologies: ColdFusion (F/W1), MySQL, Bootstrap, CSS, JS, jQuery
Industry: Travel

EDUCATION

• Masters degree in Computer Application from Bhilai Institute of Technology (BIT), 2011 - 2014

LANGUAGES

• English - native
