+91 9820045154 | hr@augmntx.com

Certified Salesforce Developer with strong experience building scalable solutions using Apex, Lightning Web Components (LWC), SOQL/SOSL, and declarative tools such as Flows and Process Builder. Proficient in managing users, roles, security settings, and handling end-to-end metadata and data deployments. Well-versed with Copado for efficient CI/CD and release processes. Successfully delivered projects across Sales Cloud, Service Cloud, Community Cloud, and Field Service Lightning. Known for clear communication, collaborative teamwork, and delivering high-impact Salesforce implementations.

INDUSTRIES: Consumer Goods and Services, Manufacturing

TECHNICAL SKILLS

• Salesforce Administration	6 years
• Apex Class	5 years & 5 months
• Lightning Web Component	5 years & 5 months
• Aura components	5 years & 5 months
• Rest API	5 years & 5 months

SOFT SKILLS

Strong communication and interpersonal skills, with a client-focused and collaborative mindset. Adaptable team player who thrives in cross-functional environments. Proactive, detail-oriented, and effective at problem-solving and time management.

PROJECT DETAILS

• Salesforce Stripe Integration January-2024 - December-2024

Project Description: Implemented a seamless integration between Salesforce and Stripe to automate subscription management, invoicing, and payment processing. The integration was built using Apex classes, custom objects, and Stripe APIs to manage customer billing, track invoices, handle payment retries, and sync subscription data. The solution ensured accurate financial reporting inside Salesforce while reducing manual effort.

Responsibilities: Designed and developed custom LWC components to display and manage complex data (e.g., equipment calibration, subscriptions, and work orders). Implemented dynamic tables and forms with conditional rendering and validation logic. Integrated LWCs with Apex controllers to fetch and update Salesforce records in real time. Used Lightning Data Service (LDS) for CRUD operations without Apex where applicable. Built responsive and reusable components following Salesforce Lightning Design System (SLDS) standards. Applied client-side caching and optimized SOQL queries in Apex to improve performance. Developed decision-based flows and validation prompts through LWCs to guide users. Collaborated with business stakeholders to gather requirements and translate them into scalable UI solutions. Wrote test cases and achieved high coverage for LWC components. Developed integration between Stripe and Salesforce

Technologies: Salesforce Stripe

Industry: Consumer Goods and Services

• BENCH ACCOUNTING March-2023 - December-2023

Project Description: Developed and customized Salesforce Lightning Web Components (LWC) to enhance user experience and streamline business workflows. The project focused on building interactive and reusable components integrated with Salesforce data, ensuring faster performance and improved usability for end-users.
