Senior Software Engineer with 7.3 years of experience in Web Application Development. Intend to build a career with a leading corporate of hi-tech environment with committed and dedicated people, which will help me to explore myself fully and realize my potential. Willing to work as a key player in a challenging and creative environment.

INDUSTRIES: SaaS, Government

TECHNICAL SKILLS

• Cold Fusion	7 years & 3 months
• SQL	7 years & 3 months
• Java Script	7 years & 3 months
• HTML	7 years & 3 months
• CSS	7 years & 3 months
• jQuery	7 years & 3 months
• FW 1	3 years
• Cold Box	3 years

PROJECT DETAILS

• Title Evaluation Platform

Project Description: The project involved modernizing and enhancing a legacy ColdFusion-based application. The system was migrated from ColdFusion 11 to ColdFusion 23, later transitioned to Lucee on Linux servers, and integrated with AWS services for storage and communication. The application supports file uploads, email notifications, monitoring, and performance tracking.
Responsibilities: Migrated the application from ColdFusion 11 to 23, and later to Lucee on Linux. Configured AWS AMI setup and integrated S3 bucket for file upload API. Implemented AWS SES for automated email notifications. Worked with the team to implement new features and resolve support tickets. Strengthened application security by handling SQL injections, enabling script protection, and applying admin-level configurations. Built a relic monitoring tool to track performance and trigger automatic email alerts during downtime/issues.
Technologies: ColdFusion 11 to ColdFusion 23, Lucee, MySQL, AWS (AMI, S3, SES), Linux, Bootstrap, Relic Monitoring Tool
Industry: SaaS

• Tender Management System

Project Description: The Tender Management System is a web-based platform designed to manage end-to-end tendering processes. It provides features for tender creation, submission, evaluation, and tracking, with a focus on security and usability. The front-end is developed using Vue.js, while the backend uses Lucee with FW1 framework for business logic and API handling.
Responsibilities: Developed new user stories and fixed bugs raised in support tickets. Implemented new features in the UI using Vue.js with self-learning. Developed and enhanced the frontend using Vue.js 3.2. Ensured web security by making all requests as POST, securing cookies, and enabling script protection. Configured security at the application level to prevent vulnerabilities. Resolved sprint tickets and provided clarifications/support to other developers in the team.
Technologies: Lucee (FW1 Framework 4.5), Vue.js 3.2, MySQL, ColdFusion security configurations
Industry: Government

EDUCATION

• Masters degree in MCA from Bharathiar University 2014 - 2016

LANGUAGES

• English - native
