Forward-thinking Senior Software Engineer with background working effectively in dynamic environments. Fluent in ColdFusion and SQL programming languages with 9+ years of experience. Proud team player focused on achieving project objectives with speed and accuracy. Having ColdFusion experience for 8 years, familiar with SQL scripts and 6 months in vueJS.

INDUSTRIES: Event Management, Software Development, Education, Insurance

TECHNICAL SKILLS

• Cold Fusion	9 years
• SQL	9 years
• HTML	9 years
• CSS	9 years
• JavaScript	8 years
• jQuery	8 years
• FW 1	2 years
• Cold Box	2 years

PROJECT DETAILS

• PresideCMS

Project Description: The Preside Content Management System was designed to manage the ticketing system for event management. It also allowed dynamic site creation using a form builder. Users could book and schedule events, participants, venues, fees, dates, and times. It included a waiting list feature that automatically assigned priority if a booking was canceled.
Responsibilities: Involved in design and development, database integration, and implementing event booking workflows. Participated in requirement analysis and supported client-side interaction.
Technologies: ColdFusion, JavaScript, jQuery, XML, CSS, ColdBox Modification, SQL Server 2014, CF Builder, SQL Server Client, CommandBox, JIRA, GIT
Industry: Event Management

• Lucee Core

Project Description: The project focused on working with the Lucee core to resolve compatibility issues and add new features. Test cases were written and executed to ensure stability and reliability.
Responsibilities: Developed and updated Lucee core functionality, wrote and executed test cases, and resolved compatibility issues.
Technologies: Lucee, MxUnit, CommandBox, Sublime, JIRA, GIT
Industry: Software Development

• International Student Service

Project Description: The project provided an online solution for international students. Data was extracted from SEVIS using JSoup and stored in the database. The application managed student registration and visa-related details using stored procedures, triggers, and schedulers.
Responsibilities: Designed and developed application modules, implemented data scraping logic, optimized database with stored procedures and triggers, and supported student data management features.
Technologies: ColdFusion, MSSQL, jQuery, JSoup, ColdBox, Sublime, JIRA, GIT
Industry: Education

• Insurance Domain

Project Description: The project was developed for managing insurance approval and accounting. Data followed a hierarchical approval flow from request submission to final approval. The front end used Angular, while most business logic resided in the backend.
Responsibilities: Worked on backend logic development, contributed to Angular front end when required, and supported insurance process workflows.
Technologies: ColdFusion, MSSQL, jQuery, Angular, Sublime, JIRA, FileZilla
Industry: Insurance

EDUCATION

• Bachelors degree in IT from P.S.R.Engineering College, Sivakasi 2011 - 2015

LANGUAGES

• English - native
