PROJECT DETAILS

• QIABASE — April-2025 - September-2025

Project Description: Involved in Go-Live/Cutover & Hyper Care support. Performed verification of mappings for ECC to S4 HANA for company codes, GLs & Trading Partners. Missing configuration for update type as part of other flows is added and relevant posting specs and account symbols were updated. Aligned with business and development for the regulatory codes issues due to which payments were failing at bank. Corrected the validation for SCB Indicator for cross border freefrom payments.
Responsibilities: Review the configuration and documentation. Fixing issue during Hypercare.
Technologies: SAP TRM BCM IHC
Industry: Health care

• ARLX — February-2024 - December-2024

Project Description: Discussed on the business process related to Commodity Natural Gas with BAs and Business Teams to gather the requirements. As SAP CTRM is expensive, time consuming, resource intensive and we have a very few commodities to deal with, we have implemented an alternative solution using SAP FX Risk Management. This is less expensive and easy to implement/adopt solution.
Responsibilities: Preparing the blueprint Design and configure the system as per the blueprint. Train the users and documentation
