Professional Experience of around 5+ years in Unibasic/Pick Basic (programming language) on Unidata/Universe (database). Good understanding of Software Development Life Cycle models (Agile) and experienced in requirement gathering, impact analysis, documentation, design, programming/coding, testing and post implementation production support. Displays applied problem solving and analytical skills. Actively participates and directs teams including the Incident Management in identifying the root cause of incidents. Extensive experience in executing SQL queries on Universe database to retrieve data for further validation.

INDUSTRIES: Health care, Insurance

TECHNICAL SKILLS

• unidata	5 years & 5 months
• pickbasic	5 years & 6 months
• universe	5 years & 5 months
• SQL	2 years & 3 months
• Python	2 years

PROJECT DETAILS

• cvs July-2019 - September-2022

Project Description: Involved in building the application using Pick Basic & Universe based on the requirement specification.eveloped code using Pick Basic, Universe to interact with different application Prepared Unit Test plans and conducted Functional Testing, Re-Testing & Regression Testing. Working on development, testing and regression testing for smooth deliveries. Performing Root Cause analysis and submitted Known errors. Moving code changes to different environments and immediate fix if any issues reported

Responsibilities: Check for any production bugs reported due to the change. Provided support and inputs in Agile software deployments. Interacting with the client to create Application Design Documents (ADD). Provided necessary support during UAT to ensure sign-off.Deploying the application and providing Post-Implementation Support during the warranty period.

Technologies: Unidata, Pick basic, Universe

Industry: Health care
