• Git	10 years

PROJECT DETAILS

• Insurance portal

Project Description: A vehicle retailer and insurance provider needed a centralized system to manage customer vehicles, streamline insurance processing, and automate vehicle maintenance reminders.
Responsibilities: I am responsible for end-to-end full-stack development, which includes designing and implementing both front-end and back-end solutions. I actively communicate with clients to gather requirements, provide updates, and ensure their expectations are met. Additionally, I perform detailed analysis of project needs, breaking down complex requirements into actionable tasks to deliver efficient and high-quality solutions
Technologies: .me,t reactjs, sql
Industry: Insurance

• Online Driving School Management

Project Description: Streamline scheduling, payments, and communication with our web-based driving school management system. Ideal for franchises and multi-branch operations.
Responsibilities: Responsible for developing and maintaining a web-based driving school management system designed to streamline scheduling, payment processing, and communication between administrators, instructors, and students. The solution is tailored to support both single schools and large-scale franchise or multi-branch operations, ensuring efficiency, scalability, and user-friendly experiences across all locations.
Technologies: .NET, Reactjs,SQL Server
Industry: Education
