Enthusiasm and dedicated team player to learn and adapt in the tech field. I was the secretary of my department in 2nd year. I'm passionate about coding, problem-solving, and exploring the latest technologies.Currently, I'm honing my skills in web development and actively working on projects to apply what I've learned. I'm excited to continue growing in this field and contribute to innovative solutions.

INDUSTRIES: Education, Recruitment and Job Portal industry

TECHNICAL SKILLS

• React	1 years
• HTML & CSS	1 years
• Graphic Design	1 years
• Java	1 years
• Machine Learning	5 months

SOFT SKILLS

Problem-solving, Communication

PROJECT DETAILS

• Kalvi — May-2025 - July-2025

Project Description: Kalvi is an educational web platform designed to enhance learning accessibility for students. It provides organized course materials, interactive learning resources, and progress tracking features. Developed using modern web technologies, the platform focuses on a clean UI and seamless navigation to create an engaging and efficient learning experience.
Responsibilities: I developed the frontend and backend of the Kalvi educational platform, ensuring smooth navigation and responsive design. I implemented core features like course listing, content access, and user progress tracking, while maintaining code quality and version control through GitHub.
Technologies: React Js
Industry: Education

• FairTrust — November-2024 - January-2025

Project Description: Developed a role-based job portal during a 2-month internship at Altruisty Innovation Pvt. Ltd., featuring intuitive interfaces for Job Posters, Job Seekers, and Admins. Built the frontend using React.js, enabled job posting and search functionalities, and deployed the app with GitHub version control.
Responsibilities: I designed wireframes and developed responsive frontend interfaces for Job Poster, Job Seeker, and Admin roles using React.js. I implemented core features, managed version control via GitHub, and helped deploy the FairTrust application on a live hosting platform.
Technologies: Html, CSS & Js
Industry: Recruitment and Job Portal industry

EMPLOYMENT HISTORY

• AI/ML Intern June-2025 - August-2025

Description: Worked on developing and optimizing machine learning models and AI-based applications using tools such as TensorFlow, Keras, PyTorch, OpenCV, and Scikit-learn. Gained hands-on experience in deep learning architectures, data preprocessing, and real-world problem solving. Collaborated with the team to design and implement innovative AI solutions while enhancing technical and analytical skills.

• Full Stack Developer November-2024 - January-2025

Altruisty pvt ltd

Description: I completed a 2-month internship at Altruisty from November to January as a Web Developer, where I mainly worked on the frontend and strengthened my skills in building user-friendly interfaces. It was a valuable experience that helped me grow in a real project environment and understand the workflow of full stack development. While I'm confident with frontend technologies, I'm still in the process of learning and improving my backend skills. I'm excited to keep building on this foundation as I explore new opportunities in tech.

EDUCATION

• School degree in Computer Science from Carmel Higher Secondary School 2020 - 2022

LANGUAGES

• English - advanced
