FullStack .NET Developer with over 12 years of experience in designing and developing scalable web applications using Microsoft technologies like ASP.Net Core, Angular, and C#. He has strong expertise in database design, system optimization, and leading enterprise projects across diverse domains such as Document Digitization, Healthcare, and E-Commerce.

INDUSTRIES: Machinery Processing, Document Digitization, Fitness, IOT Solutions, e commerce, Legal, Financial, Project Management

TECHNICAL SKILLS

• Github	12 years & 2 months
• C#.NET	12 years & 4 months
• JSON	12 years & 5 months
• JavaScript	12 years & 2 months
• HTML & CSS	12 years & 1 months
• ASP.NET MVC	11 years & 1 months
• Web API	11 years & 4 months
• Angular 2+	10 years & 2 months
• T SQL MS SQL Server	10 years & 1 months
• JQuery	10 years & 7 months
• Azure	10 years & 7 months
• MongoDB	9 years & 9 months
• AJAX	9 years & 4 months
• TypeScript	9 years & 6 months
• Entity Framework	9 years & 3 months
• ADO.NET	8 years & 2 months
• ASP.Net Core	8 years & 6 months

SOFT SKILLS

Requirement Gathering, Database Design, Team Management, Code Reviews, Process Alignment, Communication, Teamwork

PROJECT DETAILS

• Total Energies — December-2018 - October-2019

Project Description: Development of multiple modules (Platform, MLCM, Catwin) for time-series machinery processing workflows.
Responsibilities: Developed modules while ensuring system integrity with no regression issues. Handled SonarQube, Checkmarx, and Dependabot to eliminate vulnerabilities and code duplication. Contributed to feature development as per business and functional requirements.
Technologies: .NET Core, Angular
Industry: Machinery Processing

• Doc-flow March-2014 - November-2014

Project Description: Digitization platform for processing hard copy documents across 50+ sub-projects in Finance, Insurance, Transport, Health Care, and Social sectors; with workflows for registration, identification, cleanup, data entry, and digital transfer.
Responsibilities: Led database design and development. Drove project with focus on document digitization workflows.
Technologies: .NET Core, Angular 7
Industry: Document Digitization

• KnetK October-2017 - June-2018

Project Description: A gym management product tracking visitor counts, lead conversions, and sales; integrated multiple 3rd party tools (ClubOs, ClubReady, Motionsoft, Segmatrics, Typeform).
Responsibilities: Led analysis, database design, and development. Resolved issues with 3rd party DLL integrations. Drove project direction and client communication.
Technologies: .NET Core
Industry: Fitness

• IoT Connect Platform Provider November-2016 - June-2017

Project Description: Platform for building IoT applications with modules like Partner Connect, Support Management, Admin Management, and Device Connect.
Responsibilities: Designed database and led development activities. Provided technical direction and aligned deliverables with project manager expectations.
Technologies: .NET Core, Angular 7
Industry: IOT Solutions

• ExpressKitchen December-2012 - June-2013

Project Description: E-commerce shopping cart platform built on open-source .NET solutions.
Responsibilities: Completed end-to-end development and testing. Ensured delivery within client timelines.
Technologies: .NET, MVC 4.0
Industry: e commerce

• P3 Law November-2015 - July-2016

Project Description: Legal document search engine for Public Private Partnership initiatives supporting bulk uploads, keyword tagging, and document comparison.
Responsibilities: Led database design, analysis, and development. Developed search functionalities and document comparison modules.
Technologies: .NET Core (Cross-platform)
Industry: Legal

• Individual Retirement Arrangement August-2013 - January-2014

Project Description: Tax analysis solution illustrating wealth transfer scenarios for IRA owners across six inheritance/distribution scenarios.
Responsibilities: Conducted requirement analysis and database design. Developed application logic to handle multiple tax scenarios.
Technologies: .NET Core, Angular 7
Industry: Financial

• Web Doc-flow & Project Management January-2015 - August-2015

Project Description: Web-based solution providing traceability of ongoing project work and digitized documents with multiple sub-projects hosted on IIS subdomains.
Responsibilities: Developed core modules and managed database design. Delivered analysis and aligned technical direction with senior stakeholders.
Technologies: .NET Core, Angular 7, ASP.Net MVC
Industry: Project Management

EDUCATION

• Masters degree in Computer Applications from Ahmedabad University 2010 - 2012

LANGUAGES

• English - advanced
