More than 7+ years of experience in web development with Laravel (v10+), PHP (8.2+), and MySQL/PostgreSQL. Led development teams, ensuring high-quality code, robust architecture, and timely delivery. Designed and developed scalable backend services and microservices using Laravel and Docker. Built responsive UIs using VueJs, HTML5, CSS3, JavaScript, jQuery, and Tailwind CSS. Basic knowledge of Next.js (with React) and TypeScript for frontend development. Integrated RESTful APIs and webhooks for RCS, WhatsApp, SMS, and Email communication. Optimized application performance, scalability, and complex database queries. Managed deployments and collaborated effectively with QA, DevOps, and product teams. Used Git, Bitbucket, and VS Code for version control and seamless team collaboration. Wrote clean, reusable, and modular code following best practices. Strong team player with solid problem-solving and decision-making skills. Leveraging AI tools to accelerate development, improve productivity, and write efficient code.

INDUSTRIES: Education, Food and Beverages, HR Tech, Logistics, Real Estate, Architecture
