With over 9 years of experience as a software developer, combined with leadership roles, I am eager to bring my expertise in MySQL, PHP, Laravel, CodeIgniter (CI), JavaScript, jQuery, Angular, AWS, Ajax, Git, CSS, and HTML to your esteemed team. Throughout my career, I have demonstrated proficiency in developing robust and scalable software solutions using a diverse range of technologies. My hands-on experience with backend technologies like PHP and MySQL, coupled with frameworks such as Laravel and CodeIgniter, has enabled me to create efficient and dynamic web applications. Additionally, my expertise in frontend development using JavaScript, jQuery, Angular, and CSS, ensures a seamless user experience across various platforms. One of the highlights of my career is my experience as a team leader, where I successfully led cross-functional teams to deliver high-quality projects on time and within budget. I strongly believe in fostering a collaborative and inclusive work environment, where team members are empowered to contribute their best work. My leadership approach emphasizes effective communication, mentorship, and the cultivation of a positive team culture. I am excited about the opportunity to leverage my skills and experiences to contribute to the continued success and growth of your organization.

INDUSTRIES: Marketplace, Financial

TECHNICAL SKILLS

• MySQL	9 years & 4 months
• JavaScript	9 years & 4 months
• PHP	8 years
• Laravel	7 years
• AWS	4 years
• Team Leadership	4 years & 5 months
• CodeIgniter	1 years
• Angular	1 years

PROJECT DETAILS

• Moon Invoice December-2020 - March-2023

Project Description: I developed the admin panel and website for a payment app, and seamlessly integrated the payment gateway. This is a versatile payment gateway that individuals can seamlessly integrate into their projects for transaction and payment-related functions. Additionally, I've incorporated bank APIs to enhance the payment functionality. Used Technology: PHP, Laravel, MySQL, Jquery, JavaScript, HTML5, CSS

Responsibilities: - Monitored the continuous operation of assigned programs, promptly addressing issues by diagnosing and rectifying logic and coding errors. - Possess extensive experience and proficiency in REST API development using Laravel. - Integrated various third-party APIs including SMS, FCM notifications, Social Networks, Google Analytics, Payment gateways, and AWS services. - Optimized queries and effectively managed MySQL databases, resulting in enhanced script execution. - Refactored, modularized, and modernized legacy code bases to adhere to contemporary development standards, thereby reducing operational expenses and enhancing functionality. - Managed a team of three individuals.

Technologies: PHP, Laravel, Codeigniter, MySQL, AWS, Jquery, JavaScript, HTML5

Industry: Marketplace

• Artha Networks

Project Description: The product offers network management functionality tailored for multiple organizations. It accommodates various types of organizations, such as enterprises, enabling them to create deals and allowing investor users and organizations to bid for investments. Additionally, the platform offers a range of other features to support organizational needs.
Responsibilities: I'm leading this project as a team lead alongside three other members, directly collaborating with the client to understand requirements and all aspects of the project. Based on this collaboration, I formulate plans and execute them regularly.
Technologies: PHP, Laravel, MySQL, AWS, Jquery, JavaScript, HTML5
Industry: Financial
