Backend Developer with over 6 years of experience in building, optimizing, and maintaining scalable web applications using PHP, Laravel, and MySQL . Skilled in designing clean, modular architectures and developing RESTful APIs that ensure smooth communication between backend systems and modern frontend frameworks such as Livewire and Angular. Experienced in AWS (S3, EC2) deployment, server configuration, and version control using Git. Strong knowledge of database design, query optimization, and system scalability. Passionate about writing clean, maintainable code, following best practices (SOLID principles, REST standards), and collaborating within Agile teams using tools like Postman, JIRA, and VS Code to deliver high-quality software solutions.

INDUSTRIES: product, Web Development

TECHNICAL SKILLS

• Laravel	6 years & 1 months
• REST APIs	5 years & 6 months
• PHP	4 years & 5 months
• API Integration	4 years & 8 months
• MySQL	4 years & 6 months
• Bit Bucket	4 years & 8 months
• Github	3 years & 3 months
• Third party Integration	3 years & 2 months
• Angular	1 years & 6 months
• CodeIgniter	1 years & 1 months

PROJECT DETAILS

• Manageteamz

Project Description: ManageTeamz is a web and mobile-based delivery management solution designed to help businesses efficiently manage and track their delivery operations in real time. The platform enables admins, dispatchers, and drivers to coordinate seamlessly, improving delivery accuracy, route optimization, and customer satisfaction.

Responsibilities: Developed and maintained backend APIs and core logic for delivery assignment and tracking. Handled database operations and ensured optimized data flow between backend and frontend. Fixed and enhanced several frontend components for better usability and data accuracy. Collaborated with QA and design teams to debug, test, and deploy stable releases.

Technologies: Laravel (Backend) MySQL JavaScript jQuery (Frontend) RESTful APIs AWS / Cloud Hosting,Angular

Industry: product

• yadeno

Project Description: Responsible for developing, maintaining, and enhancing the event management platform. Collaborated with cross-functional teams to ensure smooth event scheduling, user registration, and booking functionalities.
Responsibilities: Backend Development Designed and developed modules for event creation, user registration, and booking management. Implemented APIs to handle event listings, ticketing, and payment workflows. Managed database architecture for storing event, user, and transaction data. Frontend Collaboration Worked with frontend developers to ensure smooth data integration and enhance UI/UX flow. Fixed layout issues and implemented validation for registration and booking forms. Admin & User Features Built and maintained the admin panel to manage events, users, and reports. Added search, filter, and analytics functionalities for better event tracking. Performance & Security Optimized application speed and database queries. Implemented user authentication, access control, and data validation for secure operations. Testing & Deployment Conducted testing and debugging to ensure reliable functionality across devices. Supported deployment and maintenance of the production environment.
Technologies: PHP,Laravel,Livewire,Ajax,Javascript,Jquery,Mysql,FTP,Boostrap,Tailwind
Industry: Web Development

• Bobspros

Project Description: Business Management Service is a web-based platform that enables businesses to register, promote, and manage their operations from a single dashboard. The system allows companies to post opportunities, recruit employees, and connect with potential clients or partners. It serves as a centralized hub for business visibility, workforce management, and collaboration.
Responsibilities: Business registration and profile management. Job posting and recruitment management system. Dashboard to track business performance, leads, and activities. Communication and collaboration tools for businesses and recruits. Admin panel for managing users, approvals, and analytics.
Technologies: PHP,Laravel,Livewire,Ajax,Javascript,Jquery,Mysql,FTP,Boostrap,Tailwind
Industry: Web Development

EMPLOYMENT HISTORY

• Software Developer

Description: • Understanding the requirements and converting it into user interface modules. • Worked as a developer. (HTML, CSS, JavaScript, JQuery & PHP) • Develop as a cross-browser compatible. • Responsive Web design for all devices.

• PHP developer February-2019 - March-2022

sharesoft Technology
Description: • Understanding the requirements and converting it into user interface modules. • Worked as a developer. (HTML, CSS, JavaScript, JQuery & PHP) • Develop as a cross-browser compatible. • Responsive Web design for all devices

EDUCATION

• Bachelors degree in Computer Allication from Madurai Kamaraj Univeristy 2012 - 2015

LANGUAGES

• English - intermediate
