+91 9820045154 | hr@augmntx.com

12 years of professional IT experience in developing web-based and enterprise applications. Expertise in designing, developing, and deploying robust ML/DL models, with a focus on Generative AI. Built Conversational AI, RAG-based systems, and multi-agent applications. Skilled in end-to-end AI solution development: data preprocessing, feature engineering, model training, and deployment. Familiar with Multi-Agent Collaboration Protocols (MCP) and A2A communication. Strong experience in Microservices architecture, API integrations, and cloud-native deployments. Proficient in AKS, Azure/AWS cloud services, CI/CD, and Agile methodologies. Experienced in mentoring junior developers and cross-functional collaboration. Expertise in API integrations, data ingestion workflows, and cloud- native applications. Skilled in client interactions, requirement analysis, and translating business needs into technical solutions. Experienced in maintaining CI/CD pipelines, release management, and Windows Server environments.

INDUSTRIES: Software and Platforms, Software

TECHNICAL SKILLS

• .NET Framework	10 years
• C#	10 years
• .NET Core	8 years
• Unit Testing	7 years
• Docker	6 years
• Azure	5 years
• SQL	5 years
• Kubernetes	4 years
• Web API	3 years
• CICD Automation	3 years
• AWS	3 years

SOFT SKILLS

Communication, Time management

PROJECT DETAILS

- LegalGPT

Project Description: LegalGPT helps legal professionals get accurate, contextually grounded answers from real statutes, case law, and contracts using advanced RAG and LLM techniques
Responsibilities: Legal Question Answering with source-cited answers Contextual document retrieval via semantic search Summarization of contracts and court rulings Multi-jurisdiction support and document grounding
Technologies: React.js / Streamlit, Python FastAPI, Azure Blob / AWS S3, Docker, Kubernetes
Industry: Software and Platforms

• Digital Ticketing System

Project Description: A dispatch management system that automates scheduling and improves logistics efficiency using SCADA integration.
Responsibilities: Designed backend services for automated ticket dispatch and scheduling Integrated SCADA systems for real-time data ingestion Deployed apps on cloud (Azure & AWS) Built CI/CD pipelines via Octopus & Azure DevOps
Technologies: ASP.NET Core, Angular, AWS, Azure, SQL Server, Snowflake
Industry: Software and Platforms

• Vital Sync Healthcare

Project Description: Patient monitoring platform for hospitals that alerts staff when critical thresholds are crossed using device-integrated data.
Responsibilities: Developed APIs to handle medical telemetry data Real-time alerts for patient vital thresholds Supported deployment and UAT cycles
Technologies: ASP.NET Core, Angular, AWS, SQL Server, Snowflake
Industry: Software

EMPLOYMENT HISTORY

• Senior Software Developer June-2017 - July-2018

Description: Developed bioinformatics tools using Python and Django, handling large datasets efficiently

EDUCATION

• Masters degree in MCA from PUNE UNIVERSITY 2008 - 2010

LANGUAGES

• English - advanced
